Providing Creative Solutions to Common Problems

ORTHODONTIC RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

Debt Collection for Orthodontic Practices

Recovering defaulted payment plans, after-insurance balances & self-pay ortho receivables — on pure contingency

Prepared for **G Orthodontics** · July 2026

01 — INTRODUCTION

A recovery partner for the balances patients leave mid-treatment

To Jesus and the G Orthodontics team — thank you for reaching out. An orthodontic practice runs on long treatment arcs: braces and Invisalign cases carried over 18 to 30 months on in-house monthly payment plans. When a plan defaults part-way through — or a patient responsibility is left after insurance — the balance is large, personal, and hard to collect once the case is off the schedule.

Defaulted payment plans aren't a front-desk problem — they're a cash-flow problem. A stalled ortho contract, an after-insurance balance, or a self-pay case left unpaid quietly ages into a write-off while your team is focused on treatment, not chasing statements across two offices.

Southwest Recovery Services works patient receivables on **pure contingency since 2004** — licensed and bonded where required, including Texas, and HIPAA-aware in how we handle patient information. Recovery is **reputation-first**: firm, professional, and protective of the name and reviews Dr. Garcia has built since 2008. You place accounts through a secure portal that takes a patient-A/R aging export from your practice-management system. No recovery, no fee.

02 — AT A GLANCE

Two decades of receivables recovery — nationwide

A documented, compliant recovery process a multi-location practice can plug in alongside its treatment and financial coordinators — without adding collections staff or putting patient goodwill at risk.

2004 Recovering commercial receivables since	**$975M+** Receivables placed (all industries)	**$76M+** Recovered for clients	**800K+** Accounts worked
52% of placed accounts see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

03 — YOUR QUESTIONS, ANSWERED

The questions a practice asks — answered directly

Exactly how we work, in plain terms, before a single account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — $0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your patient A/R.
2. Defaulted in-house payment plans	The core orthodontic receivable: monthly braces / Invisalign plans that stop paying mid-treatment. We pursue the remaining contract balance professionally — validated against the treatment agreement and ledger — so an abandoned plan stops being a write-off.
3. Will this hurt our reputation with patients?	This matters most for a practice built on referrals and reviews, and it's how we're built. Recovery is empathy-first and fully compliant — no threats, no misrepresentation. We represent G Orthodontics professionally, so a past-due family today can still be a returning family tomorrow.
4. Compliance & patient data	FDCPA, Reg F, and TCPA guardrails on every account, and HIPAA-aware handling of any patient information you place. Licensed and bonded where required, including Texas. Every contact is documented and defensible.
5. Onboarding & placement	Low-lift, across both offices. Export a patient-A/R aging report from your practice-management / ortho system (Dolphin, Cloud 9, Dentrix, or a spreadsheet) and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.

THE SWRS CLIENT PORTAL

PMS-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your patient-A/R export and give your financial coordinators live, self-service visibility across both locations.

PMS-READY PLACEMENT

Upload a patient-A/R aging export from Dolphin, Cloud 9, Dentrix or your system — we map your columns, no re-keying.

SECURE, HIPAA-AWARE EXCHANGE

Send treatment agreements, statements and account documentation safely inside the portal — the paper that resolves questions fast, handled with care.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's been recovered across Houston and Pearland.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to the practice, so balances stay accurate and no one is over-contacted.

31% recovered

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE COST OF WAITING

Why patient balances recover best while they're fresh

A patient balance is most collectible while it's fresh — the treatment is recent, contact details are current, and the case is top of mind. Every month it ages, families move, memories fade, and the balance competes with newer bills. The highest-leverage change a practice can make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates; balances left a year or more collect a fraction of that.

THE STANDING RULE

A simple "place at 90 days" policy on defaulted plans recovers more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Real placed-versus-recovered results from SWRS's dental and orthodontic book, anonymized by sub-sector; individual client names withheld. Large orthodontic payment-plan balances behave differently than small copays — documentation and account age drive recovery, so placing early matters. Results vary by account age, balance size and documentation; we give an honest, age-based read on a representative sample first.

05 — BUILT FOR ORTHODONTICS & PATIENT A/R

We understand an orthodontic ledger

A practice built on long braces and Invisalign treatment arcs creates a specific patient-A/R profile. Our playbook is built for exactly that.

Defaulted in-house payment plans

The 18–30 month braces and Invisalign plans that stop paying part-way through — the largest, most common orthodontic write-off, pursued against the treatment agreement.

After-insurance patient responsibility

The ortho benefit is capped; the balance after insurance falls to the family. We recover it without straining your front office.

Denied financing & self-pay

CareCredit denials, declines and defaults, plus cash-pay balances, become self-pay A/R — we work exactly those.

Reputation-first & HIPAA-aware

Empathetic, compliant contact that protects a referral-driven practice's name and the reviews Dr. Garcia has earned across Houston and Pearland.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
