Recovering patient balances — recovery, not billing — on pure contingency

Prepared for **Franklin and Kiai Counseling Services** · July 2026

01 — INTRODUCTION

A recovery partner for the patient balances that go unpaid

To Micheal and the Franklin and Kiai Counseling Services team — you run a counseling practice with about $1,500 in unpaid client balances sitting past 60 days — the patient-responsibility layer that piles up once your own statements stop working. Worked on pure contingency and HIPAA-conscious, that's exactly what our recovery arm is built for — and there's no minimum to place, so a small, clean list like yours is no problem at all.

Patient balances aren't a billing problem — they're a recovery problem. Once statements stop working, every month that passes makes the balance harder to collect and easier to write off.

Southwest Recovery Services is the **post-billing recovery layer** that complements your RCM — patient balances and bad debt, worked on **pure contingency since 2004**, HIPAA-conscious and compliant. You place accounts through a secure portal; we work them. No recovery, no fee.

02 — AT A GLANCE

Two decades of recovery — nationwide

A documented, professional process behind $975M+ in placements — a recovery arm your practice can plug in without hiring for it.

2004 Recovering commercial receivables since	**$975M+** Receivables placed (all industries)	**$76M+** Recovered for clients	**800K+** Accounts worked
52% of placed accounts see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

03 — YOUR QUESTIONS, ANSWERED

The questions a practice asks — answered

How it works, what it costs, how we stay compliant, and how we protect the patient relationship.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. How does the fee work?	Pure contingency — $0 upfront, no retainer, no minimum. You pay a pre-agreed percentage only of what we recover. We take small-volume placements; rates are tiered by the age and size of the balances, and we quote once we see a representative sample.
2. Do you accept small-volume placements?	Yes — a handful of accounts is fine. Whether it's a few patient balances or an aged bad-debt list, we work them the same disciplined way; there's no minimum to place.
3. How do you stay compliant?	Every account is worked inside an FDCPA / Reg F-disciplined, HIPAA-conscious process — only the minimum necessary information, secure exchange, and firm-but-professional contact. It's recovery that protects your practice's name.
4. Recovery, not billing	We are the layer that starts where your billing/RCM ends: patient responsibility balances, self-pay, and post-insurance bad debt. We don't code or bill — we recover what's already owed.
5. How do we hand it over?	Fast and low-lift. Place the accounts through our secure portal with the patient-balance detail; we map your fields, no re-keying. Outreach begins within 24–48 hours of a documented placement, and you track every account 24/7.

THE SWRS CLIENT PORTAL

Secure placement and full visibility, on demand

Every placement is managed through our secure portal — built to take your patient-balance exports and give your team live, self-service visibility throughout recovery.

SECURE, MINIMAL-DATA PLACEMENT

Upload only the patient-balance detail we need — we map your fields, no re-keying.

SECURE FILE EXCHANGE

Statements and supporting documentation move safely inside the portal.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of your recovery.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to your office, so balances stay accurate and no one is over-contacted.

THE COST OF WAITING

Why fresh patient balances recover best

A patient balance is most collectible while it's fresh, before contact data goes stale. Research from the Commercial Collection Agencies of America puts collectability at **under 25% once a balance passes a year old**. The highest-leverage change isn't sending more statements — it's placing sooner.

THE AGE CURVE

Fresh balances resolve fastest; balances that sit a year collect a fraction of that.

THE STANDING RULE

A fixed "place at 90–120 days" policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on your accounts before anything is worked.

---

05 — BUILT FOR PATIENT-A/R RECOVERY

We speak your patient ledger

Patient balances have their own recovery profile — consumer-debt rules, HIPAA, and a patient relationship worth protecting. Our playbook is built for exactly that.

Patient balances & bad debt

Self-pay, post-insurance responsibility and aged bad debt — worked with a documented, compliant process.

Small-volume friendly

No minimum to place — a few accounts or an aged list, same disciplined recovery.

HIPAA-conscious & compliant

FDCPA / Reg F guardrails and minimum-necessary data on every account — recovery that protects your practice.

Recovery, not billing

The post-billing layer that complements your RCM — we recover what's owed, we don't replace your billing.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AKTOS

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**

A practice collects from the patients it still serves — so recovery stays firm, professional, and compliant. That protects the patient relationship and your practice's reputation.
