SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

RESTORATION & INSURANCE-CLAIM RECEIVABLES · CAPABILITIES OVERVIEW

Debt Collection for Restoration Contractors

Recovering insurance-claim balances, homeowner deductibles & commercial restoration invoices — on pure contingency

Prepared for **SERVPRO of Lakewood/Ken Caryl** · July 2026

01 — INTRODUCTION

A recovery partner for the balances that stall after the job dries out

To Seth and the SERVPRO Team Landers group — a high-volume restoration operation runs one of the most complex receivables books there is: insurance-carrier balances stuck in adjuster limbo, homeowner deductibles and approved supplements left unpaid, commercial and municipal accounts on net terms, and reconstruction draws that stretch DSO. Even a well-staffed AR team can only chase so far.

Restoration A/R isn't a paperwork problem — it's a cash-flow problem. Carrier delays, underpaid supplements, unpaid deductibles, and slow commercial accounts tie up money you've already earned and quietly age toward write-off while your crews keep responding 24/7.

Southwest Recovery Services works restoration and contractor receivables on **pure contingency since 2004** — an extension of your AR team for the balances that have stalled. We do it **reputation-first**: firm, professional, compliant, with skip tracing on the business and its principals when a commercial account goes quiet. Place accounts through a secure portal that takes your A/R aging export. No recovery, no fee.

02 — AT A GLANCE

Two decades of commercial recovery — nationwide

A documented, compliant recovery process that plugs in alongside your controller and AR manager — scale for the aged balances your team doesn't have time to keep chasing.

2004 Recovering commercial receivables since	**$975M+** Receivables placed (all industries)	**$76M+** Recovered for clients	**800K+** Accounts worked
52% of placed accounts see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

03 — YOUR QUESTIONS, ANSWERED

The questions a restoration operator asks — answered directly

Exactly how we work, in plain terms, before a single account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — $0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your A/R.
2. Insurance-carrier balances & supplements	Aging carrier balances and approved supplements that never get paid out — we validate against the estimate (Xactimate scope), photos and file, and pursue the balance professionally without disrupting the carrier relationship.
3. Homeowner deductibles & out-of-pocket	The deductible or non-covered portion the policyholder owes after the claim settles — a classic slow / disputed bucket. Validated against your work authorization and invoice, then recovered.
4. Commercial, municipal & reconstruction accounts	Net-terms accounts for property managers, hotels, municipalities and businesses, plus reconstruction draw / progress billing that stretches DSO — worked with persistent demand and commercial skip tracing on the business and its principals.
5. Onboarding & placement	Low-lift. Export an A/R aging report from your system (DASH / WorkCenter, Xactimate, QuickBooks, or similar) or a simple spreadsheet, and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.

THE SWRS CLIENT PORTAL

Billing-system-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your A/R export and give your controller and AR team live, self-service visibility throughout recovery.

BILLING-SYSTEM-READY PLACEMENT

Upload an A/R aging export from DASH / WorkCenter, Xactimate or QuickBooks — we map your columns, no re-keying.

SECURE FILE EXCHANGE

Send work authorizations, invoices, estimates and photos safely inside the portal — the documentation that resolves disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's been recovered, alongside your own AR reporting.

DIRECT-PAYMENT REPORTING

Log payments a customer or carrier makes directly to you, so balances stay accurate and no one is over-contacted.

100% recovered

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE COST OF WAITING

Why restoration balances recover best while they're fresh

A restoration balance is most collectible while it's fresh — the claim is open, the adjuster is engaged, and the file, estimate and photos are current. Every month it ages, adjusters move, policyholders scatter, and leverage erodes. The highest-leverage change a restoration operator can make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates — the 60–100% recoveries above — while balances left a year or more collect a fraction of that.

THE STANDING RULE

A simple "place at 90 days" policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Real placed-versus-recovered results from SWRS's restoration and cleaning book, anonymized by sub-sector; individual client names withheld. Results vary by account age, balance size and documentation quality; we give an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR RESTORATION CONTRACTORS

We understand a restoration ledger

An insurance + commercial + reconstruction restoration book creates a specific receivables profile. Our playbook is built for exactly that.

Insurance-carrier balances & supplements

Aging carrier balances and approved supplements stuck in adjuster limbo — validated against the estimate and file, then recovered without disrupting the carrier relationship.

Homeowner deductibles & out-of-pocket

The deductible and non-covered portion the policyholder owes after the claim settles — a classic slow bucket, worked professionally.

Commercial, municipal & reconstruction

Net-terms accounts for property managers, hotels and municipalities, plus reconstruction draw billing — where balances and DSO concentrate.

An extension of your AR team

You already run a controller and AR function; we take the aged, stalled balances off their plate on contingency — reputation-first and fully compliant.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
