CONSUMER BALANCES & PAYMENT PLANS · CAPABILITIES OVERVIEW

Receivables Recovery for Breeders

Recovering unpaid deposits, balances and payment-plan defaults — on pure contingency, without damaging the reputation you have built

Prepared for **Family Bred Puppies** · August 2026

A recovery partner for the balances that go quiet after the puppy goes home

To Emily and the Family Bred Puppies team — thank you for reaching out. In a business built on trust and word of mouth, the hardest money to collect is owed by a family who already has the puppy: the deposit that never converted, the balance promised on pickup day, the payment plan that stopped after the second instalment.

An unpaid balance is not a customer-service problem — it is a cash-flow problem.

You have already carried the cost of the litter, the veterinary care and the guarantee. Every balance that ages past terms is money you have earned and are unlikely to see without help.

Southwest Recovery Services is an outsourced receivables recovery partner working consumer balances on **pure contingency since 2004**. You place accounts through a secure portal, and we work them. No recovery, no fee.

Two decades of consumer-balance recovery — nationwide

A documented, compliant process built for small businesses that sell to families — follow-up capacity you do not have to hire for.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

The questions a family business actually asks

You told us balances run 31–60 days out and that you are looking at third-party collections. Here is how that works in practice.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. Your 31–60 day aging earns a better rate than an old book; fresh balances are the cheapest and most recoverable accounts we work.
2. How your customers are treated	This matters more in your business than in most. Your buyers post reviews, join breed groups and refer their friends. Every contact is calm, compliant and documented — no threats, no misrepresentation, no pressure. A recovery partner who embarrasses a customer has cost you more than the balance.
3. Deposits, balances and payment plans	Three different problems. A forfeited deposit turns on what your contract says; a pickup-day balance is usually a simple collection; a defaulted payment plan needs structured follow-up over months. We work all three, and the written agreement decides how hard each one can be pushed.
4. Disputed accounts	A dispute pauses recovery, it does not end it. We validate against the paper — your purchase agreement, health guarantee, deposit terms, the message history — and speak with both sides. Clear signed terms usually resolve it inside 30–60 days.
Compliance	Consumer balances fall under the FDCPA and Reg F, and we work them inside those rules by design. That protects you as much as the customer: a business that hands accounts to an aggressive collector inherits the liability.

Simple placement, full visibility

Every placement runs through our secure portal — built so a small team can place accounts in minutes and see exactly what is happening afterwards.

SPREADSHEET-READY PLACEMENT

Upload a simple list or export — we map your columns, so there is no re-keying and no special software to learn.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — live status on every placed balance.

SECURE FILE EXCHANGE

Send purchase agreements, deposit terms and message history safely inside the portal — the documentation that settles a dispute fast.

DIRECT-PAYMENT REPORTING

Log payments a customer sends you directly, so balances stay accurate and nobody is contacted after they have already paid.

SWRS Consumer-Balance Case Studies

Southwest Recovery does not have a breeder-specific book, and we would rather say so than invent one. What we do have is two decades of the same structural problem: an individual owing a modest balance to a small, reputation-dependent animal-care business. These are actual placed-versus-recovered results from that book, anonymized, with the honest spread included.

**WHY 31-60 DAYS IS THE BEST
POSITION TO PLACE FROM**

The same balance is worth several times more now than a year from now

Your webform says 31-60 days. That is the most useful number you gave us, because recovery tracks the age of a balance more closely than any other variable — the 92% and the 20% above are the same kind of account at different ages.

THE AGE CURVE

Fresh balances resolve at multiples of what a one- or two-year-old account returns; contact data is still good and the purchase is still recent in the customer's mind.

THE STANDING RULE

A fixed "place at 60 days" policy recovers materially more than letting balances drift — and on contingency there is no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

We speak your ledger

Selling to families creates a specific recovery profile — modest balances, individual buyers, and a reputation you cannot afford to spend. Our playbook is built for that.

Deposits and pickup-day balances

The money promised before the puppy went home, pursued against what your purchase agreement actually says.

Payment-plan defaults

Structured, patient follow-up on instalment arrangements that stopped part-way — the accounts a small team has no capacity to chase.

Customers who go silent

Skip tracing to re-establish contact when a phone number stops working and email goes unanswered.

Reputation-safe contact

FDCPA and Reg F compliance built into the workflow, so recovery never turns into a public complaint about your business.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that returns more of each aging balance and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. He became convinced the industry's bad reputation was a choice, not a requirement.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person. Two decades later he still coaches the teams and works accounts personally.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

A family that owes you money today may still be the family that refers three more — so recovery stays respectful. That protects the reputation Family Bred Puppies has built in Goshen since 2017.
