

Providing Creative Solutions to Common Problems

RESIDENTIAL HVAC & PLUMBING RECEIVABLES • CAPABILITIES OVERVIEW

Receivables Recovery for Residential HVAC & Plumbing

Recovering past-due homeowner service and replacement balances across DFW and Houston — on pure contingency

Prepared for **Silver Spur Heating, A/C & Plumbing** • September 2026

A recovery partner for the invoices a homeowner stops answering

To Becky Hennessey and the Silver Spur finance team — the hardest dollars a home-services contractor collects are the ones owed after the work is already in the ground: the \$99 service call that never gets paid, and the \$20,000 system replacement where the homeowner goes quiet once the equipment is running.

A past-due homeowner balance is not a customer-service problem — it is working capital you have already spent. Parts, labor, truck time and warranty exposure are all committed on day one. Every month the balance ages, contact data goes stale and the recoverable share falls.

Southwest Recovery Services has worked receivables on **pure contingency since 2004**, from 12 offices in 7 states, with an active book of residential HVAC, plumbing, roofing and home-services contractors. You place accounts through a secure portal that takes your existing aging export. No recovery, no fee.

Two decades recovering home-services receivables

A documented, compliant process built for contractors whose debtors are homeowners — the customers Silver Spur may well sell to again, and the neighbours they talk to.

Your questions — answered in order

The twelve items on your list, grouped and answered directly for a residential HVAC and plumbing book across DFW and Houston.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Home-services experience	This is an active vertical for us, not an adjacency. Our current book includes residential HVAC, plumbing, roofing, pool, electrical and irrigation contractors — including multi-market Texas operators placing homeowner balances at the same \$99–\$20,000 spread you described. Case results from that book appear later in this overview, low performers included.
2. Recovery rates & timelines	Recovery is driven more by age at placement than by any other single factor. Fresh accounts — under about 90 days past due — commonly resolve within 30 to 60 days. Balances that sit a year or more recover a fraction of that. We give you an honest, age-based read on a representative sample of your aging before a single account is worked, rather than a headline percentage that does not survive contact with your file.
3. Fees & additional costs	Pure contingency — \$0 upfront, no retainer, no monthly minimum, no charge on anything we do not collect. Credit bureau reporting, the client portal, reporting, remittance and pre-collection letters are all included at no additional cost for a portfolio of your type. The only costs that ever sit outside contingency are court, filing and recording fees on accounts you specifically authorize for legal or lien action — quoted per account, in advance, never incurred without your written approval. A full fee schedule accompanies this overview.
4. Small and large balances	One process, one rate, no balance floor. A \$99 service invoice and a \$20,000 system replacement are both worked; small balances are handled with a letter-and-call cadence that keeps the cost of recovery proportionate, while larger balances get documentation review, skip tracing and, where you authorize it, escalation. We do not cherry-pick a portfolio and return the small accounts.
5. Pre-collection, payment plans & settlement	Our Early-Out program works accounts in the roughly 15-to-60-day window before they ever reach full collections — address validation and NCOA scrub, a structured notice series, professional outbound contact, and accounts returned or escalated at your direction. Payment plans and settlements are negotiated inside the authority Silver Spur sets at onboarding; anything outside it comes back to you for approval.

YOUR QUESTION

SOUTHWEST RECOVERY SERVICES

6. Credit reporting, liens & legal escalation

We report and update qualifying consumer accounts to Experian and Equifax under FCRA and Metro 2 — included, no setup fee. Lien-eligible accounts are identified at placement and routed to our filing partner or counsel; Texas homestead lien rights are narrow and we will tell you plainly which of your accounts actually carry them and which are better served by credit reporting and statutory interest. Nothing goes to an attorney or to a lien filing without your written approval and a per-account quote.

THE SWRS CLIENT PORTAL

Placement, visibility and remittance in one place

Every account is managed through our secure portal — built to take your existing AR aging export and give your finance team live, self-service access throughout recovery.

AGING-EXPORT PLACEMENT

Upload an aging export from ServiceTitan, Housecall Pro, QuickBooks or your field-service platform — we map your columns, so there is no re-keying.

SECURE DOCUMENT EXCHANGE

Send signed work orders, invoices, estimates and change orders inside the portal — the paperwork that resolves a disputed homeowner balance fastest.

REAL-TIME REPORTING

Run and export account status and recovery reports on demand, at any hour, without waiting on a rep.

DIRECT-PAYMENT REPORTING

Log payments a homeowner makes directly to Silver Spur so balances stay accurate and no customer is ever contacted about money already paid.

6% recovered

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

WHY THE SPREAD IS THIS WIDE

Age at placement explains almost all of it

The difference between the 83% result and the 6% result on this page is not effort and it is not the trade — it is how old the balances were when they arrived. Contractors who place on a fixed schedule land at the top of this range; contractors who place only after a year of in-house chasing land at the bottom.

THE AGE CURVE

Balances under ~90 days past due commonly resolve in 30–60 days. A book placed at 12–24 months behaves like the low end of this page, and we will say so before you place it.

THE STANDING RULE

A written “place at 90 days” policy recovers materially more than letting balances drift toward write-off — and on contingency there is no cost to placing early.

Recovery varies by portfolio. SWRS gives an honest, age-based read on a representative sample of your aging before any account is worked.

Recovering the balance without costing you the customer

Your debtors are homeowners in the neighbourhoods you sell into. Recovery that damages a reputation is not recovery — it is a marketing expense you did not budget for. Every consumer contact we make is governed by the FDCPA, Regulation F and the Texas Debt Collection Act.

Homeowner accounts, handled professionally

Firm, documented, compliant contact — no threats, no misrepresentation, no conduct that turns a past-due customer into a public complaint.

Disputed workmanship claims

Documentation-driven validation using your work orders, estimates, change orders and signed approvals — separating a genuine warranty dispute from a stall.

Every balance in the book

From a \$99 service call to a full system replacement — one partner, one portal, one process, no balance floor.

DFW and Houston coverage

Texas-resident recovery operations from our Addison headquarters, with reach across all 50 states as Silver Spur grows.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a homeowner is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that lifts recovery and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
