SELF-PAY PATIENT BALANCES · CAPABILITIES OVERVIEW

# Receivables Recovery for Dental Practices

Recovering aged self-pay treatment balances — on pure contingency, with the discretion a wellness practice depends on

Prepared for **Biological Dentistry of Albuquerque** · August 2026

## A recovery partner for the balances that outlived the treatment plan

To Faith and the team at Biological Dentistry of Albuquerque — thank you for reaching out. A biological practice carries a receivables profile most dental offices do not: SMART protocol amalgam removal, ozone therapy, biocompatibility testing and restorative work are largely elective and largely self-pay, so there is no insurance backstop when a patient stops paying.

**Self-pay balances are bigger and they are entirely yours to carry.** A multi-visit mercury removal case or a full restorative plan is not a \$200 co-pay — and when it ages past 90 days, the practice absorbs the whole amount, not the patient portion of it.

Southwest Recovery Services is an outsourced receivables recovery partner working healthcare and patient balances on **pure contingency since 2004**. You place through a secure portal, and we work them. No recovery, no fee.

## Two decades of healthcare recovery — nationwide

A documented, compliant process and a real dental track record — the follow-up a single-location practice cannot run without pulling someone off the front desk.

## What a practice owner should ask before placing

Including the honest answer about a book that is entirely 90+.

| YOUR QUESTION                                   | SOUTHWEST RECOVERY SERVICES                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Fee structure</b>                         | Pure contingency — \$0 upfront, no retainer, no minimum. You pay a pre-agreed percentage only of what we actually recover. Balances you have already reserved against cost nothing to attempt.                                                                                                                                                                  |
| <b>2. What a 90+ book realistically returns</b> | You told us your aging is entirely 90+. That matters more than any other detail on your form. Our dental book runs from roughly 45% down to 15%, and the practices at the top placed at 60–90 days. A book that is wholly past 90 belongs in the lower half of that range. We would rather set that expectation now than quote you an average you will not see. |
| <b>3. How your patients are treated</b>         | The first question most wellness-focused owners ask, and rightly. Your patients chose you for a philosophy of care, and many found you through referral or community. Every contact is calm, compliant and documented — no pressure tactics, no threats. A collector who embarrasses a patient costs you more than the balance.                                 |
| <b>4. Disputed balances</b>                     | A dispute pauses recovery, it does not end it. We validate against the treatment plan, the signed financial agreement and the ledger, and speak with both sides. For elective and biocompatible work, a clear written consent and fee agreement usually settles it inside 30–60 days.                                                                           |
| <b>Placement mechanics</b>                      | Export your aging from your practice-management system and upload it — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.                                                                                                                                                                                         |

**THE SWRS CLIENT  
PORTAL**

## **Practice-management-ready intake, with full visibility**

Every placement runs through our secure portal — built to take your aging export and give a small team live, self-service access.

### **AGING-EXPORT PLACEMENT**

Upload straight from your PM system — we map your columns, no re-keying.

### **SECURE FILE EXCHANGE**

Send treatment plans, signed financial agreements and ledgers safely inside the portal — the documentation that settles a dispute.

### **REAL-TIME REPORTING**

Run and export account and recovery reports on demand — live status on every placed balance.

### **DIRECT-PAYMENT REPORTING**

Log payments taken at the front desk, so balances stay accurate and no patient is contacted after paying.

► **Portal Video Tour**

## SWRS Dental Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's dental book, anonymized and sized to a single-location practice. The spread runs 45% to 15%, and the difference is almost entirely age at placement. Because your book is wholly 90+, plan around the lower half of this range.

### DENTAL PRACTICE

**Metro practice, placed early**

**\$31.0K** recovered

of ~\$69K placed

45% recovered

### GENERAL DENTAL PRACTICE

**Single-location practice**

**\$24.7K** recovered

of ~\$61K placed

40% recovered

### DENTAL & LASER PRACTICE

**Elective-led practice**

**\$7.2K** recovered

**Elective self-pay clinic**

**\$4.3K** recovered

of ~\$22K placed

19% recovered

### DENTAL PRACTICE — 90+

**BOOK**

**Practice placing at write-off**

**\$5.5K** recovered

of ~\$38K placed

15% recovered

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

**WHY THE LAST ROW IS THE  
ONE TO READ**

## **The same balance, placed a year apart, is a different account**

The 45% and the 15% were worked by the same people to the same process. What changed was when the balance arrived. A patient balance placed at 90 days still has a working phone number and a recent memory of the treatment; at two years it has neither.

### **WHAT THIS MEANS NOW**

Your existing 90+ book is worth placing — at zero cost it can only beat the zero it currently returns — but expect the lower half of the range.

### **WHAT CHANGES THE NEXT BOOK**

A standing rule of placing at 90 days rather than at write-off is the single change that moves a practice from the bottom of this table toward the top.

*Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.*

## Cutting the days between treated and paid

Days Sales Outstanding and Average Collection Period measure the same thing: how long completed treatment sits as a receivable before it becomes cash. A book that is wholly past 90 days sits far outside any healthy band, and every further month erodes both the recoverable value and the working capital behind it.

### Self-pay treatment balances

Elective and biocompatible work carries no insurance backstop — the full balance is the practice's to recover.

### Multi-visit case balances

Larger staged treatment plans where a structured payment arrangement recovers more than pressure ever will.

### Patients who have moved on

Skip tracing to re-establish contact when a phone number stops working and email goes unanswered.

### Reputation-safe contact

Compliant, documented outreach that protects a practice built on referral and community trust.

## Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

### AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

### Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

### Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

### Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

### **API-first intake**

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

### **Data-driven scoring**

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that returns more of each aging balance and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

## Built by a collector with 30 years on the phones — not a CEO with zero collection experience

### Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, trained collectors across 100+ locations for Aaron's, and has spent nearly 30 years in receivables.

He founded Southwest Recovery Services in 2004 on one principle: the industry's bad reputation is a choice, not a requirement. Two decades on he still coaches the teams and works accounts personally.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

A patient with an aged balance may still be a patient — wellness-focused care brings people back for years. Recovery stays professional and documented so the relationship survives the conversation.
