Receivables Recovery for Medical Practices

Recovering aged patient-responsibility balances across your Nashville-area locations — on pure contingency

Prepared for **Premier Pain & Spine Center, PLLC** · September 2026

A recovery partner for the balances your team shouldn't have to chase

To the Premier Pain & Spine Center team — thank you for reaching out. You told us your average outstanding balance runs 61–90 days, with a share of your book aged past 90, and that you're looking for third-party collections. Here's a straight answer on how that works.

Patient-responsibility balances that age past 90 days recover at a fraction of what a 30-day balance recovers. Every month a balance sits unworked, contact information goes stale and the odds of a payment plan fall further.

Southwest Recovery Services is a healthcare-focused revenue-cycle recovery partner working patient balances on **pure contingency since 2004**, with a process built around dignity and discretion — because how your patients are treated during collection reflects directly on your practice. You place accounts through a secure portal; we work them. No recovery, no fee.

Two decades of healthcare-focused recovery

A documented, compliant process built specifically for patient-responsibility balances — scale a growing multi-location practice can plug in without adding headcount.

Your questions — answered directly

What you asked when you reached out, in order, plus the details that matter for a patient-balance book.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover, so there's no risk in placing and no cost if we don't collect. Consumer/patient-balance rates scale with the age and volume of your placements; we quote your exact rate once we see a representative sample of your aging report.
2. How patients are treated	Compliant outreach across email, text, live and AI-assisted calls, voicemail, mailed notices, and a secure 24/7 patient portal — every contact scored first to set the right strategy. FDCPA and Reg F govern every touch; nothing about your patients' care or your practice's name is put at risk.
3. Disputed balances	A dispute pauses recovery, not the relationship — we validate the account against your billing records, EOBs and statements and follow up directly with the patient. Most disputes resolve within 30–60 days once the paperwork is reviewed.
4. Onboarding & placement	Fast and low-lift. Upload your aging report through our secure portal — we map your columns, so there's no re-keying. Outreach begins within 24–48 hours of a documented placement.
5. Credit reporting	Where lawful and applicable, we report through Equifax and Experian (including Experian RentBureau for rental-adjacent balances) — never TransUnion, never all three bureaus.

Secure intake and full visibility, on demand

Every placement runs through our secure portal — built to take your aging-report exports and give your front-office team live, self-service visibility throughout recovery.

AGING-REPORT-READY PLACEMENT

Upload your patient aging export directly — we map the columns, no re-keying required.

SECURE FILE EXCHANGE

Send EOBs, itemized statements and correspondence safely inside the portal — the documentation that resolves disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — live visibility into what's being worked and what's been recovered.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to your office, so balances stay accurate and no patient is over-contacted.

The honest read on a 90+ day book

A patient balance is most collectible in the first 90 days after the final statement. Once a share of the book crosses that line — as some of yours has — recovery on those specific accounts settles toward the lower end of the range above; the fresher portion of your book will recover meaningfully better.

THE AGE CURVE

Balances under 90 days often resolve in 30–60 days; balances over a year recover a fraction of that — which is why placing sooner, not chasing harder, is the highest-leverage change.

THE STANDING RULE

A fixed “place at 90 days” policy across all three locations recovers materially more than letting balances drift — and on contingency there’s no cost to placing early.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

Cutting the gap between billed and collected

For a growing, multi-location practice, patient-responsibility AR competes for staff time with scheduling, billing and patient care. Every month a balance ages past your 90-day mark, it becomes harder to collect and more likely to end in write-off.

Aged & non-responsive balances

Persistent, compliant multi-channel outreach for patients who've gone quiet after a final statement, plus address and phone tracing on stale contact information.

Disputed & contested balances

Documentation-driven validation — EOBs, itemized statements, payment history — that resolves genuine disputes without pressuring your patients.

Every patient-responsibility balance type

Deductibles, co-insurance, self-pay, and post-insurance residuals across all three of your locations — one partner, one portal.

Nationwide reach, healthcare discretion

Recovery across all 50 states from 12 offices in 7 states, with a process built around protecting the patient relationship and your practice's reputation.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right patient balance first.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a patient is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

Portal-first intake

Secure portal placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention on your freshest patient balances.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
