SMALL-BUSINESS LENDING · CHARGED-OFF LOAN RECOVERY · CAPABILITIES OVERVIEW

Receivables Recovery for Mission-Driven Lenders

Recovering charged-off small-business loans — compliant, reputation-safe, on pure contingency

Prepared for **LiftFund** · September 2026

Southwest Recovery Services, LLC · Recovering commercial & consumer receivables since 2004

Private & confidential

A recovery partner for the loans that charged off — without spending the trust you've built

To the LiftFund team — the hardest dollars a mission-driven lender ever tries to recover are the ones already written off: small-business loans that stopped performing, borrowers who went quiet, and a growing book of charged-off principal that still belongs to the fund and to the capital you re-lend into the community.

A charged-off loan is not a lost loan — it's working capital sitting idle. Every dollar recovered on a written-off note is a dollar you can lend back into another entrepreneur, without raising a cent of new capital. But for a lender whose brand is community trust, *how* those dollars come back matters as much as whether they do.

Southwest Recovery Services works charged-off consumer and commercial receivables on **pure contingency since 2004**, with recovery reach across the country. We treat every borrower as a person and every lender relationship as worth protecting — compliant, documented, never the aggressive tactics that would put your mission at risk. You place through a secure portal that takes your loan-servicing export; we work the accounts. No recovery, no fee.

Two decades of receivables recovery — nationwide

A track record built on high-volume consumer and commercial receivables and a documented, compliant process — recovery capacity a lending team can plug in without building a collections shop or a compliance function for it.

The questions a mission lender actually asks — answered directly

In the order they matter for a community lender placing charged-off small-business notes: how your borrowers are treated first, then the mechanics you asked about.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. How our borrowers are treated	This is the first thing that matters for a lender whose reputation is its collateral. Every account is worked with dignity and discretion — respectful, documented contact, never threats or misrepresentation. We're built on the belief that people pay faster when recovery is handled with respect, and our work is designed to protect LiftFund's standing with the communities you serve while the money comes back.
2. Compliance & licensing	Charged-off small-business loans are a mix of consumer and commercial obligations, and we work them accordingly. Consumer / sole-proprietor balances are handled under FDCPA and Reg F; commercial balances under commercial rules. Compliance guardrails — consent and phone checks, documented outreach, credit-bureau reporting only where lawful — are enforced inside the workflow on every account. We scope placements to the states where each account type can be lawfully worked.
3. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover, and the rate scales with the age and balance of what you place. We give you a real number once we've seen a representative sample of your charged-off file; on contingency there is no cost to letting us try an aged note.
4. Skip tracing & non-responsive borrowers	The core of what you asked for. Persistent multi-channel outreach, plus skip tracing on the business, its successors and the principals and guarantors behind a loan that's gone silent — the difference between a note that's uncollectable and one that simply needs the borrower found. A third-party demand on agency letterhead alone re-engages a meaningful share of silent charged-off accounts.
5. Pre-legal review, legal escalation & judgments	For accounts with documentation and personal guaranties that still won't engage, we run pre-legal review, coordinate legal escalation and support litigation for judgment, and handle collateral recovery where a security interest exists — the full path you outlined, sequenced so the low-cost recovery is exhausted before anything moves to legal.

6. Onboarding & placement

Fast and low-lift. Bulk-upload a charged-off export from your loan-servicing system through our secure portal; we map your columns, so there's no re-keying, and outreach begins within 24–48 hours of a documented placement.

**THE SWRS CLIENT
PORTAL****Loan-servicing-ready intake and full visibility, on demand**

Every placement is managed through our secure portal — built to take your charged-off loan export and give your team live, self-service access throughout recovery.

LOAN-SERVICING-READY PLACEMENT

Upload a charged-off export from your servicing system — we map your columns, no re-keying of borrower, balance, origination and charge-off data.

SECURE FILE EXCHANGE

Send notes, loan agreements, guaranties and payment histories safely inside the portal — the documentation that turns a disputed balance into a recoverable one.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's coming back off your written-off book.

DIRECT-PAYMENT REPORTING

Log payments a borrower makes directly to LiftFund, so balances stay accurate and no one is over-contacted.

SWRS Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's financial-services and comparable commercial receivables, anonymized by sector and sized to a book like yours. An honest note up front: SWRS's deepest track record is in commercial and consumer receivables rather than CDFI micro-lending specifically, so these are structurally comparable books — and because a charged-off, 90-plus-day file recovers materially lower than fresh receivables, the spread below runs from strong recoveries on documented, fresher accounts down to low single digits on deeply aged paper. Your blended result depends on your age mix and the quality of borrower contact data; we read a representative sample before quoting.

THE AGE CURVE ON CHARGED-OFF PAPER

Why age is the single biggest driver on a written-off loan book

A charged-off loan is most collectible while the borrower is still findable and the trail is warm. Every additional month past charge-off, contact data goes stale, guarantors move, and leverage erodes — which is exactly why a 90-plus-day book recovers toward the low end of the range and a fresher, well-documented file recovers many times higher.

THE FRESHER ACCOUNTS

The under-one-year notes in your file — with current borrower data and intact guaranties — are where the real recovery lives; they behave like the upper end of the spread above.

THE AGED TAIL

The two-to-three-year charged-off paper recovers low no matter who works it; the honest play is to place it now on contingency while any contact data is still valid, rather than let it keep aging toward zero.

Recovery varies by portfolio; SWRS gives an honest, age-based read on a representative sample of your charged-off file before any accounts are worked.

Turning written-off principal back into lendable capital

A charged-off note isn't dead — it's working capital parked on the wrong side of the ledger. The job is to find the borrower, re-engage them with respect, and recover what's collectable through the lowest-cost channel that works, escalating to legal only when the documentation supports it.

Silent & non-responsive borrowers

Skip tracing on the business, its successors and the principals and guarantors behind a loan that's gone quiet, plus persistent multi-channel demand — finding the borrower is most of the battle on aged paper.

Pre-legal, legal escalation & judgments

Documentation-driven pre-legal review, coordinated legal escalation, support for litigation to judgment, and collateral recovery where a security interest exists — the escalation path you outlined.

Consumer & commercial, one partner

Sole-proprietor and personally-guaranteed balances under FDCPA / Reg F, commercial balances under commercial rules — a mixed charged-off book worked correctly through one portal.

Nationwide reach, lawful scope

Recovery across the country from 12 offices in 7 states, with each account worked only where its type can be lawfully collected — built for a borrower base spread across many states.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first partner delivers enterprise-grade speed, consistency, and auditability on a high-volume charged-off book.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict recovery likelihood and concentrate effort where it's most achievable on a charged-off book — earlier borrower contact, fewer wasted touches, and a higher recovery rate on the accounts worth working.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
