

Providing Creative Solutions to Common Problems

FORMER-RESIDENT RECEIVABLES · CAPABILITIES OVERVIEW

Receivables Recovery for Manufactured Housing Communities

Recovering former-resident balances across a multi-state community portfolio — on pure contingency

Prepared for **Kingsley Management Corporation** · October 2026

A recovery partner for the balances that leave with the resident

To Noah Webster and the Kingsley Management reconciliations team — across 73 communities, the hardest dollars to recover are the ones owed by a household that has already moved out: final lot rent, unpaid utilities and fees, and damages assessed after move-out, owed by someone your on-site team no longer has a reason to see.

Former-resident balances aren't a leasing problem — they're a reconciliation problem. Every move-out ledger that ages past the point your community managers can chase it quietly becomes a write-off, while the same household applies to live somewhere else.

Southwest Recovery Services is an outsourced receivables recovery partner working residential and property-management portfolios on **pure contingency since 2004**. You place by secure batch upload straight from your in-house platform — CSV or Excel, your columns, no re-keying. No recovery, no fee.

Two decades recovering residential receivables

A track record built on high-volume resident and property-management placements worked by a documented, compliance-first process — the scale a lean corporate back office can plug in without hiring for it.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

Commercial & B2B collections since 2004

Your three criteria — answered directly

Exactly what you asked, in order, plus the detail that matters for a multi-state manufactured-housing portfolio.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Multi-state coverage	We recover residential and former-resident balances across the large majority of the United States, and we will be exact with you rather than easy: SWRS does not take consumer placements in California, Oregon or Washington, and Minnesota is restricted. Every other state in your footprint is serviceable today. Tell us the state distribution of the 73 communities and we will mark the file precisely before you place a single account.
2. 100% contingency	Pure contingency — \$0 upfront, no setup fee, no retainer, no monthly minimum, no per-account charge, and no court or legal costs billed to you. Recovery is out of court. You pay a pre-agreed percentage only of what is actually recovered, quoted once we have seen a representative sample of your move-out ledgers and their aging.
3. Batch placement from your platform	Standard intake. Export from your in-house property management system as CSV or Excel and upload it through the client portal; we map your columns to ours, so nothing is re-keyed and no format change is required on your side. And if any of your communities run on ManageAmerica , there is no export step at all: SWRS is ManageAmerica's official collections partner, with a live API built into their platform — tag an account for collections inside ManageAmerica and the complete record, signed lease and SODA included, arrives in our intake instantly. Outreach begins within 24–48 hours of a documented placement.
Credit reporting — the rental advantage	We report to Equifax and Experian, including Experian RentBureau , the rental-specific exchange. On former-resident balances this is the single strongest lever in the program: the balance follows the household into its next rental application, which is where a large share of voluntary resolution comes from. Most agencies bidding this work do not carry RentBureau reporting.
Documentation & disputes	A disputed move-out balance pauses recovery, it does not end it. The accounts that resolve are the ones that arrive itemized — rent, utilities, fees and damages separated, with the ledger and the deposit disposition attached. Where your file carries that detail, disputes close in days instead of months, and the account survives validation cleanly.

Batch placement from your own system, and full visibility after

Every placement runs through our secure portal — built to accept exports from in-house and third-party property management platforms and give your reconciliations team live, self-service access throughout recovery.

MANAGEAMERICA API PLACEMENT

SWRS is ManageAmerica's official collections partner. Tag an account inside ManageAmerica and the full record — resident data, every transaction, signed lease and SODA — transfers to us in real time. One click, zero exports.

SECURE DOCUMENT EXCHANGE

Send leases, itemized ledgers, deposit dispositions and move-out inspections safely inside the portal — the documentation that closes disputes fast.

CSV / EXCEL BATCH PLACEMENT

On any other platform, upload a move-out ledger export — we map your columns, so there is no re-keying and no format change.

REAL-TIME REPORTING

Run and export recovery and account-status reports on demand, by community or across the whole portfolio.

**WHAT ACTUALLY MOVES THE
NUMBER**

Age at placement and itemization, not pressure

The two portfolios at the bottom of that table are not worked differently from the ones at the top. They arrived older and thinner. A former-resident balance is most recoverable in the weeks right after move-out, while the forwarding address is current and the household is applying to rent somewhere else.

THE AGE CURVE

Ledgers placed within 30–90 days of move-out recover a multiple of what the same ledgers return after a year of sitting in a write-off queue.

THE FILE STANDARD

Itemized balances with the lease, the move-out inspection and the deposit disposition attached survive validation and close disputes. Unitemized lump sums invite them.

Recovery varies by portfolio. SWRS gives an honest, age-based read on a representative sample of your communities before any accounts are worked — including telling you which paper is not worth placing.

Built for the move-out ledger

A former-resident balance behaves differently from a trade invoice. There is no ongoing relationship to lean on, the household has moved, and the only durable leverage is accurate location data and rental credit reporting. That is the program we run.

Skip tracing that finds movers

Experian-backed location and phone data built for households that have changed address — the single biggest determinant of whether a move-out balance is recoverable at all.

Experian RentBureau reporting

Rental-specific tradeline reporting alongside Equifax and Experian, so the balance surfaces at the next rental application. Reporting is to Equifax and Experian.

Every resident balance type

Final lot rent and rent, utilities and pass-throughs, late and lease-break fees, and post-move-out damages — one partner, one portal, across all 73 communities.

Compliance your residents feel

FDCPA and Regulation F guardrails enforced inside the workflow, with validation notices, consent and call-frequency checks documented on every account. Your communities carry the reputational risk; we treat it that way.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention on the residents most likely to resolve, with fewer disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
