SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

ENTERPRISE SAAS & B2B RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

Receivables Recovery for Enterprise SaaS

Recovering past-due license, subscription and professional-services invoices — on pure contingency

Prepared for **Amplify-Now** · September 2026

01 — INTRODUCTION

The gap between value delivered and value banked

To Rhys Dyson and the Amplify-Now finance team — thank you for reaching out. Amplify exists to make the distance between committed value and realized value impossible to ignore. Enterprise receivables carry exactly the same gap: revenue that has been sold, delivered, recognized and reported — but never actually banked.

A past-due enterprise invoice is rarely a billing problem. It is a sponsor who left, a PO that closed, an entity that was acquired or restructured, or a professional-services milestone someone decided to contest after the work shipped. The balance stops moving, quietly ages out of the AR conversation, and becomes a write-off that never shows up as a decision anyone made.

Southwest Recovery Services is an **outsourced receivables recovery partner** working commercial B2B balances on **pure contingency since 2004**, with recovery reach across all 50 states. You place accounts through a secure portal that takes your AR / aging export, and we work them. There is no software to buy, no implementation, and no fee unless we recover.

02 — AT A GLANCE

Two decades of commercial recovery — nationwide

A track record built on high-volume B2B receivables and a documented, auditable process — scale a global finance function can plug in without adding headcount.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked
51% of matured client portfolios see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

03 — YOUR QUESTIONS, ANSWERED

Pricing, and how the relationship works

You asked two things: what it costs, and how this works in practice. Both answered directly, plus the details that matter for an enterprise SaaS receivables book.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Pricing — pure contingency	$0 upfront. No retainer, no monthly minimum, no per-account fee. You pay a pre-agreed percentage only of what we actually recover. Commercial contingency is priced off the age, balance size and volume of what you place — a book of large, recent enterprise invoices prices very differently from a long tail of small aged balances — so we quote your rate once we have seen a representative sample of your U.S. aging rather than quoting a number that turns out to be wrong for your file.
2. How the relationship works	A signed contingency agreement and a placement file. That is the entire setup. You place accounts through our secure portal, we work them, and we remit monthly with a transmittal that reconciles line-by-line to your ledger. You keep live visibility throughout. Place one account or an entire aging bucket; there is no volume commitment and you can stop at any time.
3. Customers who go silent	The core of the work. Persistent multi-channel outreach, commercial skip tracing to identify the operating entity, successors and principals behind a business that has restructured or gone quiet, and a review of legal escalation for accounts that still will not engage. On enterprise accounts the cause is usually organizational rather than financial — finding the person who now owns the payable resolves a meaningful share of silent accounts on first contact.
4. Disputed & contract-backed invoices	A dispute pauses recovery; it does not end it. We validate the balance against the paper — order form, MSA, SOW, acceptance and the communication trail — and speak to both sides. In enterprise software the executed contract and the signed acceptance are usually decisive. Dispute investigation typically adds 30–60 days.
5. Geography & cross-border	Recovery reach is nationwide across all 50 U.S. states. Amplify runs from Adelaide with teams in Los Angeles, Austin, Toronto, London and Mumbai, so we scope U.S.-domiciled paying entities first and handle Australian, Canadian, UK and other international balances through our legal-forwarding network case by case. Tell us where the paying entity sits and we will tell you plainly whether we are the right partner for that balance.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
6. Data handling & security	Placement files move through the SWRS Client Portal over an encrypted channel, not as email attachments. Every account is worked on Aktos with outreach, consent checks and documentation logged per account for audit. We will execute your NDA and DPA, and the placement file can be scoped down to the minimum fields needed to work the balance.

THE SWRS CLIENT PORTAL

AR-export-ready intake, and full visibility on demand

Every placement is managed through our secure portal — built to take your AR exports and give your finance team live, self-service access throughout recovery.

AR-EXPORT-READY PLACEMENT

Upload an aging or AR export from NetSuite, Xero, QuickBooks or your billing system — we map your columns, so nothing is re-keyed.

SECURE FILE EXCHANGE

Send order forms, MSAs, SOWs, invoices and statements inside the portal — the documentation that resolves enterprise disputes fastest.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — live status on the portfolio, not a monthly PDF.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to Amplify, so balances stay accurate and no one is over-contacted.

THE DSO ADVANTAGE

Why fresh enterprise invoices recover best

A commercial balance is most collectible while it is fresh. Every month it ages, the sponsor who signed it is likelier to have moved on, the contact data goes stale, and leverage erodes. The highest-leverage change most finance teams make is not chasing harder — it is placing sooner.

THE AGE CURVE

Accounts placed under ~90 days past due often resolve in 30–60 days; balances that have sat a year collect a fraction of that.

THE STANDING RULE

A fixed “place at 90 days” policy recovers materially more than letting balances drift toward write-off — and on contingency there is no cost to placing.

Recovery varies by portfolio. SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR ENTERPRISE SAAS & B2B RECOVERY

Cutting the days between recognized and banked

Days Sales Outstanding measures the one thing a benefits dashboard cannot: how long recognized revenue sits as a receivable before it becomes cash. Median DSO runs about 43.5 days and the strongest quartile collects in roughly 25 — every month past that erodes both recoverable value and working capital.

Churned & non-responsive accounts

Commercial skip tracing on the business and its principals, plus persistent multi-channel demand for customers who have gone quiet after a restructure or a churn decision.

Disputed & contested invoices

Documentation-driven validation — order forms, MSAs, SOWs, acceptance records — that separates a genuine dispute from a stall tactic.

Every commercial balance type

Enterprise license and subscription invoices, renewal and true-up billing, implementation and professional-services fees — one partner, one portal.

Nationwide reach

Recovery across all 50 states from 12 offices in 7 states, with international balances handled case by case through our legal-forwarding network.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**

09 — NEXT STEP

Let’s put a number against your past-due file.

A 30-minute call to walk your aging, confirm the AR export handoff, and put a contingency rate against a representative sample of your U.S. accounts. In enterprise software a past-due customer today is often a renewal conversation tomorrow — recovery is handled firmly, professionally, and in a way that protects the Amplify brand.
