

Providing Creative Solutions to Common Problems

BRAND & DEALER RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

Debt Collection for Consumer-Product Brands

Recovering dealer accounts, builder balances & channel deductions — on pure contingency

Prepared for **Ruvati** · July 2026

A Texas recovery partner for a Texas national brand

To the Ruvati team — thank you for your call today. A premium fixtures brand selling through dealers, showrooms, builders and online channels carries receivables most agencies have never worked: trade accounts past terms, dealers that closed owing balances, and channel deductions that quietly shave margin off every remittance.

Channel receivables aren't a bookkeeping problem — they're a margin problem. A dealer that fails owing five figures, a builder stretching net-30 to net-90, or a season of unchallenged chargebacks each takes back margin the brand already earned.

Southwest Recovery Services is a Texas-based commercial agency — Addison HQ, up the road from Round Rock — working B2B receivables on **pure contingency since 2004**, with commercial skip tracing on the entity *and its principals* when an account goes dark. You place accounts through a secure portal straight from your AR export. No recovery, no fee.

Two decades of commercial recovery — nationwide

A documented, compliant B2B recovery process built for exactly this: national account volume, mixed balance sizes, and channel relationships that matter.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

The questions a brand's credit team asks — answered directly

Exactly how we work, in plain terms, before a single account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover; the rate is quoted against a representative sample of your accounts — age, balance size and documentation drive it.
2. Dealer & showroom accounts	The core of a brand's book: trade accounts past terms, and dealers that closed or churned owing balances. Active accounts are worked relationship-aware — firm with the accounting office, invisible to the buying relationship; dead accounts get full commercial skip tracing on the entity and its principals.
3. Channel deductions & chargebacks	Marketplace and big-box deductions — shortage claims, compliance chargebacks, unearned allowances — are often recoverable and rarely chased. We work them documentation-first: your ASNs, PODs and remittance detail make the case.
4. Builder & project accounts	Project-quantity buyers stretch terms as construction cycles slip. A standing place-at-60/90 rule keeps the aging honest without burning the relationship — and the placement costs nothing.
5. Compliance & onboarding	FDCPA, Reg F and TCPA guardrails wherever consumer rules could apply; commercial accounts worked B2B. Onboarding is low-lift: export your AR aging, upload through our secure portal — we map your columns, no re-keying — and outreach begins within 24–48 hours.

AR-export-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built for a credit team running a national account base.

AR-EXPORT PLACEMENT

Upload your aging straight from your ERP or accounting system — we map your columns once, and every future placement takes minutes.

REAL-TIME REPORTING

Live status, recoveries and remittances on demand — the numbers your controller wants without asking anyone to compile them.

SECURE DOCUMENT EXCHANGE

Dealer agreements, invoices, ASNs and remittance detail move safely inside the portal — the paper that wins deduction disputes.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to Ruvati, so balances stay accurate and no account is over-contacted.

**THE COST OF
WAITING**

Why commercial balances recover best while they're fresh

A trade balance is most collectible while it's fresh — the relationship is recent, the paper is current, and the debtor entity still exists where you last saw it. Every month it ages, dealers close, principals move, and the balance competes with every other creditor. The highest-leverage move isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh accounts (under ~90 days past due) resolve at materially higher rates; balances left a year or more collect a fraction of that.

THE STANDING RULE

A fixed "place at 60–90 days" policy on trade accounts recovers materially more than an annual cleanup — and on contingency there is no cost to placing.

Real placed-versus-recovered results from SWRS's commercial book, anonymized by sub-sector; individual client names withheld. Results vary by account age, balance size and documentation; we give an honest, age-based read on a representative sample first.

We understand a brand's ledger

A national fixtures brand's receivables live in its channels. Our playbook is built for exactly that.

Dealer & showroom accounts

Trade accounts past terms and dealers that closed owing balances — worked relationship-aware on active accounts, and traced to the principals on dead ones.

Channel deductions & chargebacks

Shortage claims, compliance chargebacks and unearned allowances — recovered documentation-first from marketplace and big-box channels.

Builder & project balances

Project-quantity accounts that stretch with construction cycles — kept honest with a standing placement cadence.

Texas to Texas

Addison HQ, a short drive from Round Rock — same-state accountability for a national brand headquartered at home.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
