

Providing Creative Solutions to Common Problems

B2B SAAS & SUBSCRIPTION RECOVERY · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

Recovering unpaid subscription & platform invoices from accounts that have gone quiet — on pure contingency

Prepared for **Interplay Learning** · September 2026

A recovery partner for the invoices that go quiet

To the Interplay Learning finance team — the hardest dollars a SaaS business collects are the ones a customer stops paying after the value is delivered: renewals that lapse, subscription and seat invoices that age past terms, and accounts that go silent once they've decided to churn.

Past-due receivables aren't a support problem — they're a cash-flow and DSO problem. Every invoice past terms ties up working capital you've already earned.

Southwest Recovery Services is an outsourced receivables recovery partner working commercial and B2B balances on **pure contingency since 2004**, nationwide. Place accounts through a secure portal that takes an export from NetSuite, QuickBooks, Stripe or your billing system, and we work them. No recovery, no fee.

Two decades of commercial recovery — nationwide

A documented, compliant recovery process on pure contingency since 2004 — scale you can add without building a collections desk.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

Commercial & B2B collections since 2004

Your questions — answered directly

Exactly what happens to a B2B SaaS receivables book you place with us.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no minimum. A pre-agreed percentage only of what we recover, quoted once we've seen a representative sample of your aging.
2. Disputed invoices	A dispute pauses recovery, it doesn't end it. We validate against the order form/MSA, itemized invoices and usage/seat records — usually decisive for SaaS.
3. Non-responsive customers	Skip tracing to locate the operating entity, successors and principals behind a business that's gone quiet, plus persistent compliant multi-channel demand.
4. Onboarding & placement	Bulk-upload an A/R / aging export from your billing system — we map your columns. Outreach begins within 24–48 hours of a documented placement.
5. Brand-safe outreach	Firm and effective, never threatening or misrepresenting — protecting the customer relationship and your brand while we recover.

**THE SWRS CLIENT
PORTAL**

Billing-system-ready intake and full visibility, on demand

Every placement runs through our secure portal — built to take your A/R exports and give your team live, self-service visibility throughout recovery.

BILLING-SYSTEM-READY PLACEMENT

Upload an A/R / aging export — we map your columns, no re-keying.

SECURE FILE EXCHANGE

Send invoices, contracts and supporting docs safely inside the portal — the documentation that resolves disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — live status on every placed balance.

DIRECT-PAYMENT REPORTING

Log payments a debtor makes directly to you, so balances stay accurate and no one is over-contacted.

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE AGE CURVE**Why placing sooner recovers more**

A B2B software balance is most collectible while it's fresh; every month it ages, contact data goes stale and leverage erodes. Your reported book runs mostly 61–90 days — the window where recovery is strongest.

FRESH VS. AGED

Accounts under ~90 days past due often resolve in 30–60 days; balances left to sit a year collect a fraction of that.

A STANDING RULE

A fixed 'place at 90 days' policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

Cutting the days between billed and banked

DSO measures how long delivered value sits as a receivable before it becomes cash. Every month past terms erodes both recoverable value and working capital — for a subscription book, it also risks a silent churn becoming a write-off.

Churned & non-responsive

Commercial skip tracing on the business and principals, plus persistent multi-channel demand for accounts gone silent.

Disputed & contested

Documentation-driven validation — order forms, MSAs, usage logs — separating a genuine dispute from a stall.

Every commercial balance

Subscription and renewal invoices, seat overages, implementation and license fees — one partner, one portal.

Nationwide reach

Recovery across all 50 states from 12 offices in 7 states.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
