SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

FREIGHT & LOGISTICS RECOVERY · CAPABILITIES OVERVIEW

Receivables Recovery for Freight Carriers

Recovering former-driver balances for Imran Inc — on pure contingency

Prepared for **Imran Inc** · October 2026

01 — INTRODUCTION

A recovery partner for the balances left behind when a driver leaves

Prepared for Imran Inc — a carrier looking for an ongoing, documented way to place balances owed by former drivers. This overview answers the four questions in your note: fees, skip tracing, credit reporting and onboarding.

Former-driver balances are recoverable only while the trail is warm. Negative settlements, unreturned advances, equipment and escrow shortfalls and fuel card charges age quickly once a driver is gone.

Southwest Recovery Services is an outsourced receivables recovery partner working business and individual balances on **pure contingency since 2004**. You place accounts through a secure portal that takes your settlement export, and we work them. No recovery, no fee.

02 — AT A GLANCE

Two decades of recovery — nationwide

Here is how SWRS would handle settlement deficits, unreturned advances, equipment and escrow shortfalls and fuel card charges at a glance.

2004 Recovering commercial receivables since	**$975M+** Receivables placed (all industries)	**$76M+** Recovered for clients	**800K+** Accounts worked
52% of placed accounts see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Unparalleled legal research gateway
- Contingency — no recovery, no fee
- Free case review

03 — YOUR QUESTIONS, ANSWERED

Your four questions — answered directly

Your four questions, answered in the order you asked them.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — $0 upfront, no retainer, no minimum. You pay a pre-agreed percentage only of what we actually recover. Rates for claims against individual drivers are set after we review a representative sample of your accounts, and we walk through them on a call rather than in writing.
2. Skip tracing & contact	Every account is scored first, then traced for a current address, phone and email through multiple sources, and refreshed as drivers move. Compliant outreach runs across text, email, live and AI-assisted calls, voicemail and mailed notices, timed to when each account engages.
3. Credit bureau reporting	Where an account is eligible and lawful to report, we report to Equifax and Experian and keep it accurate through payment or resolution. Eligibility depends on how each claim is classified and on completing validation, so we confirm it per account and never promise a credit outcome.
4. Onboarding & documents	Upload a settlement export through our secure portal and we map the columns. Per account we ask for the signed agreement, deduction authorization, itemized settlement statement, separation date, last-known address, phone and email, and records for any equipment, escrow, advance or fuel card balance. Outreach begins within 24–48 hours of a documented placement.
Disputes	A dispute pauses recovery; it doesn't end it. We validate against the paper — the agreement, the authorization and the statement — which is why the file you described matters.
Where drivers are	We confirm each driver's location at intake, because state rules differ and some states are restricted, and we tell you before anything is worked if an account falls outside what we can do.

THE SWRS CLIENT PORTAL

Low-lift intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your exports and give your team live, self-service access throughout recovery, backed by a dedicated account manager.

SYSTEM-READY PLACEMENT

Bulk-upload an AR / aging export from your billing or ledger system (CSV/Excel) — we map your columns, no re-keying.

SECURE FILE EXCHANGE

Send agreements, invoices, statements and supporting records safely inside the portal, not over email.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live dashboard, not a monthly summary.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to you, so balances stay accurate and no one is over-contacted.

04 — CASE STUDIES

SWRS Freight & Logistics Case Studies

Actual placed-versus-recovered results from Southwest Recovery's freight and logistics clients, anonymized. Former-driver balances are a specialized claim type, and results vary widely: the age of the balance and the quality of the file drive the outcome, and some accounts recover little. We give you an honest read on a sample before any account is worked.

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

WHY PLACING SOONER MATTERS

Why fresh balances recover best

A balance is most collectible while it's fresh. Once a driver has left, contact data goes stale quickly, and every month erodes leverage. The highest-leverage change most carriers make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh accounts (under ~90 days past due) often resolve in 30–60 days; balances that sit a year collect a fraction of that.

THE STANDING RULE

A fixed "place at 90 days" policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR FREIGHT CARRIERS

From settlement statement to recovery

SWRS works best with clients that already keep signed agreements, deduction authorizations and itemized settlement statements, which is the paper trail Imran Inc described. We start from those documents and build a repeatable path from your team to ours.

Former & mobile drivers

Skip tracing built for people who have moved on, plus persistent multi-channel outreach that repeats as contact data changes.

Settlement deficits & advances

Negative settlement balances and unreturned advances, worked from your itemized statements and deduction authorizations.

Equipment, escrow & fuel cards

Equipment and escrow shortfalls and unreturned fuel card charges, documented and placed in one batch.

Documentation-first placement

We start from the agreements and statements you already keep and build a repeatable path from your team to ours.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
