REVENUE-CYCLE RECOVERY · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

Recovering patient balances and stalled therapy claims for Millennium Physical Therapy — compliantly, on pure contingency

Prepared for **Millennium Physical Therapy** · July 2026

The recovery layer for what your billing process couldn't close

Prepared for Millennium Physical Therapy — for a physical-therapy practice, net revenue leaks at the end of the revenue cycle: in the patient responsibility that stacks up across a multi-visit plan of care, the self-pay balances, and the denied or authorization-capped therapy claims that survive billing and age past the point a small office can work them.

This is the last stage of the revenue cycle, not the first. Coding, claim submission and adjudication are your billing team's job; the balances that survive that process are where net revenue quietly leaks. A patient balance worked at 60 days resolves at a far higher rate than the same balance at 300.

Southwest Recovery Services is the recovery layer that works those balances — patient A/R, insurance follow-up and bad debt — HIPAA-compliant and on pure contingency since 2004. We resolve what billing couldn't: no retainer, no setup fee, no recovery no fee. We complement your billing; we do not replace it.

Two decades of receivables recovery — nationwide, HIPAA-compliant

The recovery capacity a busy clinic can plug in without hiring for it — documented, compliance-first, and paid only on results.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

ACCREDITED & RECOGNIZED

What a clinic's billing office asks us

The questions that matter when the goal is recovering net revenue, not running billing.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
Fee structure	Pure contingency — \$0 upfront, no retainer, no setup or per-account fee. You pay a percentage only of what we actually recover, so it's a variable-cost backstop to your revenue cycle.
What we recover	We're the recovery layer, not billing: post-insurance patient responsibility (copays, coinsurance and deductibles that stack across a plan of care), self-pay and cash-pay balances, aged guarantor balances, and denied, underpaid or authorization-exhausted therapy claims — resolving what the billing process could not.
Insurance follow-up & appeals	We track each payer's filing and appeal deadlines, follow the required resolution path, and escalate before the recovery window closes — recovering earned net revenue that stalled on the claim side, including visit-cap, re-authorization and medical-necessity denials common to therapy.
Early-out & recovery timing	A balance worked at 60 days resolves far higher than at 300. Early-out (30–90 days) plus prompt bad-debt placement recover materially more than balances left to sit; outreach begins within 24–48 hours.
Compliance	HIPAA under a Business Associate Agreement (minimum-necessary PHI); FDCPA / Reg F on patient accounts; current on evolving state medical-debt credit-reporting rules — furnishing only where lawful.
Onboarding & placement	Bulk-upload a patient-AR / aging export from your practice-management system through our secure portal; we map your columns, no re-keying — a backstop to your billing, not a replacement.

Low-lift intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your patient-AR / aging exports and give your team live, self-service access throughout recovery, backed by a dedicated account manager.

SYSTEM-READY PLACEMENT

Bulk-upload a patient-AR / aging export from your practice-management or billing system (CSV/Excel) — we map your columns, no re-keying.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live dashboard, not a monthly summary.

SECURE FILE EXCHANGE

Send EOBs, statements and supporting records safely inside the portal under our BAA, not over email.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to you, so balances stay accurate and no one is over-contacted.

THE EARLY-OUT ADVANTAGE**Why early placement recovers more**

For patient AR, the age of the balance is the strongest predictor of recovery — contact data goes cold and patients disengage as accounts age.

THE AGE CURVE

Fresh balances recover a large multiple of aged ones; the decline is steep and does not reverse.

EARLY-OUT + BAD DEBT

An early-out program on fresh balances plus prompt bad-debt placement, worked in parallel, recovers materially more than a single late hand-off.

We speak revenue cycle

Physical-therapy patient and payer AR has a specific recovery profile. Our playbook is built for it, inside HIPAA.

Stacked patient responsibility

Compliant recovery of per-visit copays and coinsurance that accumulate across a plan of care — protecting the patient relationship.

Denied & capped claims

Insurance follow-up and appeals on visit-cap, re-authorization and medical-necessity denials common to therapy.

Self-pay & cash balances

Recovery of self-pay and cash-pay balances that age out of a small clinic's reach.

Compliance-first

HIPAA + FDCPA / Reg F on every account, current on state medical-debt rules.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

In healthcare, recovery has to preserve the patient relationship and represent Millennium Physical Therapy professionally — firm, compliant, and never

harassing. That protects your reputation as much as it recovers the balance.
