SKILLED NURSING & LONG-TERM CARE RECOVERY • CAPABILITIES OVERVIEW

Receivables Recovery for Skilled Nursing

Recovering resident, responsible-party and payer balances across your facilities — on pure contingency

Prepared for **Gemini Healthcare** • September 2026

A recovery partner for the balances that outlast the stay

Jimmy — thank you for reaching out. In skilled nursing, the hardest dollars to collect are the ones still outstanding after a resident has discharged, passed, or spent down: private-pay coinsurance and room-and-board shares, Medicaid patient-liability that was never remitted, responsible-party balances where the family has stopped responding, and denied or short-paid days your business office has already worked twice.

These balances don't age like a trade invoice — they age faster. Once a resident leaves the building, the address on the face sheet goes stale, the responsible party stops answering, and the account quietly moves toward write-off while your business office is busy with the current census.

Southwest Recovery Services is an outsourced receivables recovery partner working healthcare balances on **pure contingency since 2004**. You place accounts through a secure portal that takes an aging export straight out of PointClickCare, MatrixCare or your billing system — we map your columns, so nothing gets re-keyed. No recovery, no fee.

Two decades of healthcare recovery — and a deep skilled-nursing book

Long-term care is not a sideline for us. Skilled nursing and senior living is one of the largest verticals in our book, worked continuously for facilities and multi-site operators across Texas and nationwide.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

What a CFO actually needs to know

The five questions that decide whether this is worth your time, answered directly — before we ever ask for a file.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum, no set-up cost on the recovery side. You pay a pre-agreed percentage only of what we actually recover. The rate is driven by the age, balance size and volume of what you place; we quote it once we've seen a representative sample across your facilities.
2. How residents and families are treated	This is the question that matters most and we'll answer it before pricing. Every account is worked under FDCPA, Reg F and TCPA guardrails enforced inside the workflow — validation notices, contact-frequency limits and consent checks are automated, not left to an individual collector's judgment. Outreach is respectful and documented end to end. Your name stays on the account, so protecting how your families experience it is protecting our own work.
3. What we do with a non-responsive family	Skip tracing through the Experian data stack to find current address, phone and employment for a responsible party who has moved on, then persistent multi-channel outreach — letter, email, SMS and voice — timed to when someone actually engages. A third-party notice on agency letterhead alone resolves a meaningful share of accounts that have gone silent on the facility.
4. Credit reporting and Medicaid balances	We report to Equifax and Experian where it is lawful and appropriate, subject to the medical-debt reporting rules and the required waiting periods — and we will tell you plainly which of your balance types do and don't qualify. Medicaid patient-liability, private-pay room and board, and responsible-party balances each behave differently; we segment them rather than working them as one pile.
5. Onboarding and placement across eight buildings	Low-lift and centralized. Export an aging file from PointClickCare, MatrixCare or your billing system, upload it once through the portal, and we split placements by facility so you can see performance building by building rather than as one blended number. Outreach begins within 24–48 hours of a documented placement.

**THE SWRS
CLIENT PORTAL**

One login across every facility, with visibility your business office doesn't have to ask for

Every placement runs through our secure portal — built to take a long-term-care aging export and give your corporate office live, self-service access facility by facility.

BILLING-SYSTEM-READY PLACEMENT

Upload an aging export from PointClickCare, MatrixCare or your billing system — we map your columns, no re-keying and no template rebuild.

SECURE DOCUMENT EXCHANGE

Send face sheets, admission agreements, responsible-party signatures and itemized statements safely inside the portal — the documentation that resolves a disputed balance fastest.

FACILITY-LEVEL REPORTING

Placement and recovery broken out by building, not blended — so you can see which business offices are getting files out on time.

DIRECT-PAYMENT REPORTING

Log payments a family makes directly to the facility so balances stay accurate and no one is ever contacted about money they've already paid.

SWRS Skilled Nursing & Senior Care Case Studies

Actual placed-versus-recovered results from Southwest Recovery's long-term-care book, anonymized by sector and shown only where placements have fully seasoned. The spread is real and we've included the low end deliberately — recovery on this balance type tracks the age of the file more than anything else.

THE AGING CURVE IN LONG-TERM CARE

Why the discharge date matters more than the balance

The single strongest predictor of recovery on a resident balance is not how large it is — it is how long it sat after discharge. The books above that recovered 18–21% were placed while contact data was still good. The books at 6–8% were placed after the account had already been worked internally for a year or more.

WHERE THE SPREAD COMES FROM

Fresh post-discharge balances still have a working phone number and a responsible party who recognizes the facility name. A file that has sat 18 months has neither, and it collects like the bottom of that range.

THE STANDING RULE

A fixed policy — place at 90 or 120 days post-discharge rather than letting balances drift — moves a book materially up this range. On pure contingency there is no cost to placing sooner.

Recovery figures vary by portfolio and by aging mix. Before any accounts are worked we give you an honest, age-based read on a representative sample from your facilities — including telling you where we think recovery will be thin.

Recovering the revenue cycle's last mile

By the time a balance reaches your write-off review, your business office has already done the work twice. What's left is a locate problem and a contact problem — which is exactly what an outsourced recovery partner is built for.

Post-discharge resident balances

Private-pay room and board, coinsurance and spend-down shares still owed after a resident has discharged, transferred or passed.

Responsible-party & family balances

Skip tracing and respectful multi-channel outreach to a responsible party who signed the admission agreement and has since stopped responding.

Medicaid patient-liability

Applied-income and patient-liability amounts collected by the resident but never remitted to the facility — segmented and worked on their own track.

Insurance follow-up & AR management

Beyond recovery, we can work aged payer AR and denials as an extension of your business office — useful when a building is short-staffed or between BOMs.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention on resident and responsible-party balances, and fewer disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
