

Providing Creative Solutions to Common Problems

UTILITY & WATER-SUPPLY RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

Debt Collection for Water Supply Corporations

Recovering unpaid final bills from former members
— diplomatically, compliantly, on pure contingency

Prepared for **D & M Water Supply Corporation** · July 2026

A recovery partner for the final bills that leave with your members

To Ms. Mobley and the D & M board — thank you for your detailed inquiry. A member-owned water supply corporation carries a receivable most businesses never see: the unpaid final bill of a member who moved on — small balances, often with no forwarding address, multiplying quietly across roughly 2,300 meters and 140 square miles of service area.

Unpaid finals aren't an office problem — they're every remaining member's problem. In a member-owned corporation, every written-off final bill is absorbed by the neighbors who stayed and paid. Recovering them isn't aggressive — it's fair.

Southwest Recovery Services is a Texas-based agency working utility receivables on **pure contingency since 2004** — and we serve **water supply corporations across Texas today**. Recovery is diplomatic and FDCPA / CFPB Regulation F compliant by design: firm, professional, and respectful of the close-knit community your board answers to. You place accounts straight from your billing-system export through a secure portal. No recovery, no fee.

Two decades of recovery — with a real Texas utility book

A documented, compliant process built for consumer accounts — and proven on residential utility finals for Texas water supply corporations and districts.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

Your four requirements — answered directly

Taken straight from your letter, in order, plus the two things a member-owned board needs to know.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Advanced skip tracing	Yes — Experian-powered skip tracing, run daily. Locating former residential members who moved without a forwarding address is the core of our utility work: fresh address, phone and employment data on every placed account, refreshed for as long as we work it.
2. Credit bureau reporting	Yes — we report qualifying accounts to all three major credit bureaus. For a \$75–\$300 final bill, bureau visibility is the single strongest incentive to pay: the balance follows the former member to their next apartment application, car loan or mortgage.
3. Flexible, tiered fee options	Our core model is pure contingency — \$0 upfront, no retainer, no monthly minimum; you pay a pre-agreed percentage only of what we actually recover, so the program never touches your budget. On our call we'll walk tiered options for your account mix — including an early-stage demand-letter phase ahead of full phone collections — and quote your rate against a representative sample.
4. Billing-system integration	Placements load directly from your billing-system export through our secure client portal — we map your columns, so there's no re-keying — with encrypted file exchange for account documentation. We'll cover secure-transfer specifics, including SFTP arrangements, on the introductory call.
Community reputation	You said it best: diplomatic, consumer-friendly, FDICPA-compliant practices are the priority. That is how we are built — no threats, no pressure tactics, every contact documented. We represent D & M professionally, because a former member's family may still be your members' neighbors.
Board accountability	Everything your board needs to approve and oversee the program: documented compliance (FDICPA, CFPB Reg F, FCRA, TCPA), licensed and bonded where required including Texas, live recovery reporting on demand, and Texas water-supply-corporation references on request.

Billing-export-ready intake and full visibility for a small office

Every placement is managed through our secure portal — built so one office manager can run the entire program without new software or re-keying.

BILLING-EXPORT PLACEMENT

Upload the delinquent-finals export from your billing system — we map your columns once, and every future placement takes minutes.

REAL-TIME REPORTING

Run and export recovery reports on demand — the numbers your board wants to see, whenever it meets.

SECURE FILE EXCHANGE

Send account documentation safely inside the portal — encrypted end to end; SFTP arrangements discussed on the call.

DIRECT-PAYMENT REPORTING

Log payments a former member makes directly to the office, so balances stay accurate and no one is over-contacted.

18% recovered

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE AGE CURVE

Why final bills recover best when placed fresh

Look at the two water supply corporations above: finals placed steadily recovered 55 cents on the dollar; a backlog placed after it had aged recovered 18. The balance didn't change — the trail did. Every month a final sits, the former member settles somewhere new, the contact data goes stale, and the balance competes with newer bills.

THE AGE CURVE

Fresh finals (placed within ~90–120 days of move-out) resolve at several times the rate of finals left a year or more.

THE STANDING RULE

A simple “place finals at 90 days” policy — run monthly from your billing export — recovers materially more than an annual cleanup, and on contingency there is no cost to placing.

Real placed-versus-recovered results from SWRS's utility and water-supply book, anonymized; individual client names withheld. Results vary with account age, balance size and data quality — we give an honest, age-based read on a representative sample of your finals before quoting.

We understand a WSC's ledger — and its community

A member-owned water supply corporation has a receivables profile — and a reputation constraint — that most agencies have never worked. We work it every day.

Unpaid final bills of moved members

The dominant WSC receivable: small balances, high volume, debtor gone. Worked systematically — skip tracing first, bureau reporting for leverage, diplomatic contact throughout.

No-forwarding-address skips

Exactly what you asked about: Experian-powered daily skip tracing locates former members wherever they've settled — the step that makes everything else possible.

Board-safe compliance

FDCPA, CFPB Reg F, FCRA and TCPA guardrails on every account, every contact documented — a program your board can approve, oversee and defend to the membership.

Community-first conduct

Your members elected your board. Our contact is professional and respectful because in a close-knit service area, how we collect reflects on you — and we never forget it.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
