EMS & MUNICIPAL RECOVERY · CAPABILITIES OVERVIEW

# Debt Collection Agency for Businesses

Recovering unpaid ambulance-transport, utility and fine balances for the City of Pompano Beach — on pure contingency

Prepared for **City of Pompano Beach** · July 2026

## Turning uncollected EMS transport and non-tax revenue back into budget

Prepared for the City of Pompano Beach — Fire Rescue has run its own EMS transport 24/7 since 1975 across seven stations, and a coastal city treats and transports as many visitors as residents. Every transport is a bill, and the patient-responsibility balances left after insurance — especially for out-of-town patients — are among the hardest a city ever collects. Add delinquent utilities, code-enforcement fines, parking and permit fees, and the uncollected non-tax book adds up fast.

**EMS transport is the marquee bleed.** The city bills every ambulance transport through its patient portal, but a large share of patient responsibility after insurance goes unpaid — and visitors transported to the hospital leave with a balance and no local address. Those, plus delinquent utilities, fines and fees, accumulate quietly in an aging report and get written off.

Southwest Recovery Services recovers exactly this — patient EMS balances, delinquent utilities, code and permit fees — on pure contingency since 2004, worked the way a public-sector creditor should be represented: firm, professional, documented, and transparent enough to defend at a public meeting. EMS patient accounts run under HIPAA and the FDCPA. No recovery, no fee — no budget line to defend.

## Two decades of recovery — built for public-sector constraints

The recovery capacity a city can add without headcount, cost, or risk to constituent relationships — documented, compliant, and paid only on results.

## What a city finance office asks us

The questions that matter when the creditor is a public entity.

| YOUR QUESTION                                   | SOUTHWEST RECOVERY SERVICES                                                                                                                                                                                                                                                                                                                       |
|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Fee structure</b>                            | Pure contingency — \$0 upfront, no retainer, no minimum, no new budget line. You pay a percentage only of what we actually recover, so recovered EMS and non-tax revenue is net-new money to the general fund.                                                                                                                                    |
| <b>What we recover</b>                          | Unpaid EMS / ambulance-transport balances (patient responsibility after insurance), delinquent water / sewer / solid-waste accounts, code-enforcement and administrative fines, parking citations, permit / inspection / business-license fees, false-alarm fees, returned checks and special assessments — any overdue balance owed to the city. |
| <b>EMS transport &amp; out-of-town patients</b> | A beach city transports many non-residents; those patients leave with a balance and no local address, and the patient-responsibility portion after insurance often goes unworked. We skip-trace the responsible party nationwide and pursue insurance follow-up, so transport revenue isn't lost to distance.                                     |
| <b>Public accountability &amp; compliance</b>   | We work every account in firm, professional language consistent with how a public-sector creditor should be represented — no harassment, no threats, nothing that creates liability — documented thoroughly enough to defend at a public meeting or under an open-records request.                                                                |
| <b>Which rules apply</b>                        | EMS patient balances are consumer debt handled under HIPAA and the FDCPA / Regulation F; resident utility, parking and court-cost balances under the FDCPA / Reg F; business and inter-governmental balances as commercial debt. We apply each framework to the right account and report under the FCRA.                                          |
| <b>How we recover</b>                           | Nationwide skip tracing to locate transported visitors and residents who've moved (the biggest obstacle on EMS and closed-utility balances), insurance follow-up, structured payment plans, credit-bureau reporting, and pre-legal / legal escalation — including liens or tax-roll certification where the balance and Florida statute allow.    |
| <b>Onboarding &amp; aged sweep</b>              | Your fire-rescue billing or finance team uploads an aging export through our secure portal; we map your columns, no re-keying, and outreach begins within 24 hours. Place current delinquencies and a one-time sweep of aged EMS and utility balances together — on contingency there's no cost to placing old accounts.                          |

**THE SWRS CLIENT PORTAL****Low-lift intake and full, auditable visibility**

Every placement runs through our secure portal — built to take your finance / utility-billing exports and give your team live, documented status throughout recovery, backed by a dedicated account manager.

**SYSTEM-READY PLACEMENT**

Upload an aging export from your utility-billing or finance system (CSV/Excel) — we map your columns, no re-keying.

**SECURE FILE EXCHANGE**

Send account records and supporting documents safely inside the portal, not over email — important for open-records discipline.

**REAL-TIME, AUDITABLE REPORTING**

Run and export account and recovery reports on demand — a documented trail you can defend publicly.

**DIRECT-PAYMENT REPORTING**

Log payments a resident makes directly to the city, so balances stay accurate and no one is over-contacted.

#### WHY PLACE AGED MUNICIPAL DEBT

### At zero cost to place, recovery is pure upside

Municipal non-tax debt is usually left to age because working it costs staff time the city doesn't have — so it sits, then it's written off. Contingency changes that calculus entirely.

#### NO DOWNSIDE

On no-recovery-no-fee terms, placing an aged utility or EMS balance costs nothing; whatever comes back is net-new general-fund revenue.

#### PLACE EARLY, RECOVER MORE

Fresh balances recover far better than aged ones — a standing placement cadence on newly-delinquent accounts lifts the whole book over time.

## We speak your constraints

A city's receivables carry obligations a private creditor's don't. Our process is built for them.

### EMS transport recovery

Recovering unpaid ambulance-transport balances — including out-of-town patients — through nationwide skip tracing and insurance follow-up, under HIPAA and the FDCPA.

### Public-accountability compliance

Firm, professional, fully documented conduct you could defend at a public meeting — FDCPA / Reg F on resident accounts, FCRA on reporting.

### Constituent-relationship protection

Residents are taxpayers and voters; we recover respectfully and lawfully, protecting the city's standing while returning revenue.

### No budget burden

Pure contingency — no upfront cost, no new line item; recovered non-tax revenue is net-new to the general fund.

## Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

### AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

### Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

### Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

### Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

### API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

### Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

## Built by a collector with 30 years on the phones — not a CEO with zero collection experience

### Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

For a public entity, how a debt is pursued matters as much as whether it's recovered. We represent the City of Pompano Beach the way a public-sector creditor

should be — firm, professional, and fully documented  
— so the city recovers revenue while protecting the  
constituent relationships and public trust it depends  
on.
