

Providing Creative Solutions to Common Problems

COMMERCIAL & CONSTRUCTION RECOVERY · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

Recovering unpaid progress billings, retainage and change orders for Saeco Electric & Utility Ltd — on pure contingency

Prepared for **Saeco Electric & Utility Ltd** · July 2026

A recovery partner for the money held back on the job

Prepared for Saeco Electric & Utility Ltd — a specialized utility contractor's hardest dollars to collect are the ones held back after the work is in the ground: retainage that sits long past completion, progress billings a general contractor slow-pays, and approved change orders that go unpaid on public and private infrastructure jobs.

Money held back is still money you earned. Retainage, slow-paid pay apps and unpaid change orders tie up the crews, equipment and materials you already put in the ground — and every month past terms erodes leverage.

Southwest Recovery Services is a commercial, B2B-focused collection agency working business receivables on **pure contingency since 2004**, nationwide across all 50 states. Place accounts through a secure portal that takes your AR export, and we work them. No recovery, no fee.

Two decades of commercial recovery — nationwide

A track record built on high-volume B2B receivables and a documented, professional process.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

ACCREDITED & RECOGNIZED

What a utility contractor asks us

The questions that matter for a construction / utility receivables book.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
Fee structure	Pure contingency — \$0 upfront, no retainer, no minimum. You pay a pre-agreed percentage only of what we actually recover; the rate scales with the age, balance and volume of your placements. We quote against a representative sample of your accounts.
What we recover	Unpaid progress and milestone billings, held retainage, approved change orders, and final billings — owed by general contractors, developers, and public-agency-funded projects (TXDOT, county and municipal work), plus any past-due B2B balance.
Timing & aging	Recovery falls sharply with age — ~85–90% at 30 days to ~23% at a year. Outreach begins within 24–48 hours of placement; placing retainage and disputed balances promptly after completion recovers materially more than letting them sit.
Disputed accounts & slow-pay GCs	A “pay-when-paid” stall or a disputed change order pauses recovery, it doesn’t end it: we validate against the contract, pay app, change order and lien waiver and work it professionally — and pursue bond and lien rights where available, with your counsel.
Onboarding & placement	Fast and low-lift — bulk-upload an AR / aging export from your accounting system through our portal; we map your columns, so there’s no re-keying.
Compliance & reach	Nationwide across all 50 states from 12 offices in 7 states; documented, professional process; ACA International member; clean record since 2004.

Low-lift intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your AR-aging exports and give your team live, self-service access throughout recovery, backed by a dedicated account manager.

SYSTEM-READY PLACEMENT

Bulk-upload an AR / aging export from your accounting system (CSV/Excel) — we map your columns, no re-keying.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live dashboard, not a monthly summary.

SECURE FILE EXCHANGE

Send contracts, invoices, change orders, pay apps and lien/bond notices safely inside the portal, not over email.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to you, so balances stay accurate and no one is over-contacted.

THE DSO ADVANTAGE**Why fresh balances recover best**

A commercial balance is most collectible while it's fresh; every month it ages, contact data goes stale and leverage erodes.

THE AGE CURVE

Fresh accounts (under ~90 days) often resolve in 30–60 days; balances that sit a year collect a fraction of that.

THE STANDING RULE

A fixed “place at 90 days” policy — including retainage past its release date — recovers materially more, and on contingency there's no cost to placing.

We speak your job ledger

A utility-contractor receivables book has a specific recovery profile — retainage, pay apps and change orders. Our playbook is built for it.

Retainage recovery

Recovering retainage held long past completion — validated against the contract and closeout documents.

Slow-pay GCs & change orders

Documentation-driven recovery on 'pay-when-paid' stalls and disputed but approved change orders.

Bond & lien awareness

Pursuit of payment-bond and lien rights where available on public and private jobs, working with your counsel.

Nationwide reach

Recovery across all 50 states from 12 offices in 7 states.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

Firm, effective recovery has to stay professional — these are contractors and agencies you'll bid with again. That protects the relationship, protects the

Saeco Electric & Utility Ltd name, and protects you from the liability that sloppy collections create.
