*Providing Creative Solutions to Common Problems*

DENTAL & ORTHODONTIC RECEIVABLES · CAPABILITIES OVERVIEW

# Debt Collection for Dental & Ortho Practices

Recovering after-insurance patient balances, self-pay & orthodontic payment-plan receivables — on pure contingency

Prepared for **Dentistry 4 Kids, Adults & Orthodontics, Too!** · July 2026

01 — INTRODUCTION

# A recovery partner for the balances patients leave behind

To Dr. Jones and the Dentistry 4 Kids team — thank you for requesting a quote. A practice that does pediatric, family and full orthodontic care all in one place carries a specific kind of receivable: the patient-responsibility portion left after insurance, self-pay balances, and the long orthodontic payment plans that fall entirely to the family and default part-way through an 18–30 month treatment arc.

**Past-due patient balances aren't a front-desk problem — they're a cash-flow problem.** An ortho case or a large restorative treatment plan can leave a sizable balance that quietly ages into a write-off while your team is focused on care, not chasing statements.

Southwest Recovery Services works patient receivables on **pure contingency since 2004** — licensed and bonded where required, including Georgia, and HIPAA-aware in how we handle patient information. Recovery is **reputation-first**: firm, professional, and protective of the name and the trust you've built over 40+ years in Suwanee. You place accounts through a secure portal that takes a patient-A/R aging export from your practice-management system. No recovery, no fee.

02 — AT A GLANCE

# Two decades of receivables recovery — nationwide

A documented, compliant recovery process a busy single-location practice can plug in alongside its Financial Coordinator — without adding collections staff or putting patient goodwill at risk.

03 — YOUR QUESTIONS, ANSWERED

# The questions a practice asks — answered directly

You asked for a quote; here is exactly how we work, in plain terms, before a single account is placed.

| YOUR QUESTION | SOUTHWEST RECOVERY SERVICES |
|---|---|
| **1. Fee structure** | Pure contingency — $0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your patient A/R. |
| **2. Will this hurt our reputation with families?** | This matters most for a practice built on the trust of kids and parents, and it's how we're built. Recovery is empathy-first and fully compliant — no threats, no misrepresentation. We represent Dentistry 4 Kids professionally, so a past-due family today can still be a returning family tomorrow. |
| **3. Compliance & patient data** | FDCPA, Reg F, and TCPA guardrails on every account, and HIPAA-aware handling of any patient information you place. Licensed and bonded where required, including Georgia. Every contact is documented and defensible. |
| **4. What to place — and when** | The patient-responsibility portion left after insurance, self-pay balances, denied or maxed CareCredit applicants, and defaulted in-house / orthodontic payment plans. Place at roughly 90 days past due — the earlier a balance is placed, the more of it we recover. |
| **5. Onboarding & placement** | Low-lift. Export a patient-A/R aging report from your practice-management system (Dentrix, Eaglesoft, Open Dental, Curve, and others) or a simple spreadsheet, and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement. |

THE SWRS CLIENT PORTAL

## PMS-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your patient-A/R export and give your Financial Coordinator live, self-service visibility throughout recovery.

### PMS-READY PLACEMENT

Upload a patient-A/R aging export from Dentrix, Eaglesoft, Open Dental or your PMS — we map your columns, no re-keying.

### SECURE, HIPAA-AWARE EXCHANGE

Send statements, treatment plans and account documentation safely inside the portal — the paper that resolves questions fast, handled with care.

### REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's been recovered, alongside your in-house billing.

### DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to the practice, so balances stay accurate and no one is over-contacted.

*Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.*

THE COST OF WAITING

## Why patient balances recover best while they're fresh

A patient balance is most collectible while it's fresh — the visit is recent, contact details are current, and the treatment is top of mind. Every month it ages, families move, memories fade, and the balance competes with newer bills. The highest-leverage change a practice can make isn't chasing harder — it's placing sooner.

### THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates; balances left a year or more collect a fraction of that.

### THE STANDING RULE

A simple "place at 90 days" policy recovers more than letting balances drift toward write-off — and on contingency there's no cost to placing.

*Real placed-versus-recovered results from SWRS's dental book, anonymized by sub-sector; individual client names withheld. Patient A/R behaves differently than commercial debt — balances are smaller and harder to locate, so placing early matters. Results vary by account age, balance size and documentation; we give an honest, age-based read on a representative sample first.*

05 — BUILT FOR DENTAL, ORTHO & PATIENT A/R

# We understand a dental & ortho ledger

A practice combining pediatric, family and orthodontic care creates a specific patient-A/R profile. Our playbook is built for exactly that.

### Orthodontic payment-plan balances

Long ortho and Invisalign treatment arcs (18–30 months) create multi-month payment plans that default part-way through — a large, classic self-pay balance we pursue professionally.

### After-insurance patient responsibility

The portion insurance didn't cover is often where the real leakage is. We recover the patient balance without straining your front office.

### Denied financing & self-pay

CareCredit denials, maxed applicants and defaulted in-house payment plans become self-pay A/R — we work exactly those.

### Reputation-first & HIPAA-aware

Empathetic, compliant contact that protects a family practice's name and the trust you've earned with kids and parents alike.

06 — AI-POWERED COLLECTIONS

# Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

### AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

### Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

### Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

### Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

### API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

### Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

# Built by a collector with 30 years on the phones — not a CEO with zero collection experience

**Steven Dietz**

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
