

Providing Creative Solutions to Common Problems

RESIDENTIAL PROPERTY MANAGEMENT · CAPABILITIES OVERVIEW

Receivables Recovery for Property Management

Former-resident balances, unpaid rent and damage claims — recovered with discretion, on pure contingency

Prepared for **Thousand Hills Realty** · September 2026

The balances that leave when the resident does

To Yvonne Toro and the team at Thousand Hills Realty — managing more than 20 Branson communities since 1992 means most residents pay, most leases end cleanly, and a small number do not. Skipped final months, damage beyond deposit, lease breaks. Those balances walk out the door with someone who no longer has any reason to answer your calls.

Your aging is 31–60 days. That is the best position a property manager can be in. A former-resident balance is most recoverable while the forwarding address is current and the phone number still works. What you have described is a fresh book, and fresh books recover at multiples of aged ones.

Southwest Recovery Services is an outsourced receivables recovery partner working residential balances on **pure contingency since 2004**, with recovery reach across all 50 states. You place accounts through a secure portal that takes an export from AppFolio. No recovery, no fee.

Two decades of residential recovery — nationwide

A track record built on former-resident balances and a documented, compliant process — the follow-through a leasing team does not have the hours to do once someone has moved out.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

Commercial & B2B collections since 2004

Nationwide — all 50 states

The four services you asked about

Taken in the order you selected them on the form, with what each one actually does for a residential portfolio.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Credit reporting	This is the one that changes behaviour in rental. We report to Equifax and Experian , and — specific to residential — to Experian RentBureau , the rental-history database that property managers and screening companies check when a former resident of yours applies somewhere else. A balance owed to Thousand Hills surfaces on their next application. Nothing is reported until the account has been validated and the resident has had their full dispute window.
2. Skip tracing	The whole problem with a former-resident balance is that the person is gone. We run address, phone and employment tracing against the forwarding information you have, and keep working it as data refreshes. At 31–60 days your contact data is still warm, which is exactly when tracing is cheapest and most likely to land.
3. Legal escalation	Reviewed case by case, never automatic, and never without your sign-off. It is worth it on a large damage claim with solid documentation — signed lease, move-in and move-out inspection, itemized charges, photographs. It is rarely worth it on a small balance, and we will tell you so rather than run up activity on an account that will not return it.
4. Payment plans	Most former residents who pay do so over time, not at once. We set structured arrangements the person can actually keep, and they self-serve through our portal at any hour — which resolves more balances than any demand letter does. You see every arrangement and every payment as it posts.
Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum, no cost to place. You pay a pre-agreed percentage only of what we actually recover. We quote your rate once we have seen a representative sample of your aging. Missouri is a full operating state for us.

AppFolio-ready intake and full visibility, on demand

Every placement runs through our secure portal — built to take your property-management exports and give your office live, self-service visibility without an email chain.

APPFOLIO-READY PLACEMENT

Upload a delinquency or former-resident export straight from AppFolio — we map your columns, so nothing is re-keyed.

SECURE FILE EXCHANGE

Send leases, move-out inspections, itemized damage charges and photos safely inside the portal — the documentation that settles a disputed charge.

REAL-TIME REPORTING

Run and export recovery reports on demand, across the whole portfolio or one community at a time.

DIRECT-PAYMENT REPORTING

Log payments a former resident makes straight to your office, so balances stay accurate and no one is contacted over money they already paid.

SWRS Residential Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's residential book, anonymized by sector. These are predominantly **aged** placements — books that sat well past 60 days before they reached us. A 31–60 day book behaves better than most of what is shown here, and we would rather you see the honest range than a flattering one.

WHY 31-60 DAYS MATTERS**The forwarding address is the whole game**

A former-resident balance is not hard to collect because the person refuses. It is hard because they moved and nobody knows where. Every month that passes, the forwarding address goes stale, the phone changes, the employer changes. Place while the trail is warm and you are collecting; place at eighteen months and you are investigating.

WHERE YOU ARE NOW

At 31-60 days the move-out paperwork is recent and the contact data on file is usually still good — the strongest starting position in residential recovery.

A STANDING RULE BEATS A CASE-BY-CASE CALL

A fixed policy of placing at 60 days recovers materially more than deciding account by account, and on pure contingency there is no cost to placing one that later pays you directly.

Recovery figures vary by portfolio. SWRS gives an honest, age-based read on a representative sample before any account is worked.

Recovering what moved out, without becoming your reputation problem

In a market the size of Branson, how a former resident is treated gets talked about — in reviews, on local pages, and to the next prospective tenant. Recovery that embarrasses Thousand Hills Realty is not recovery. Every contact we make runs inside FDCPA and Reg F guardrails and is documented, so if someone calls your office upset, your staff can see exactly what was said and when.

Former residents who have moved on

Address, phone and employment tracing to find someone who left without a forwarding address, then persistent, respectful contact.

Damage claims beyond deposit

Documentation-driven validation using your lease, move-out inspection, itemized charges and photographs — the paper that makes a damage claim stick.

Rental-specific credit reporting

Equifax, Experian, and Experian RentBureau — the rental-history file the next property manager actually reads.

Nationwide reach

Former residents leave the state. Recovery runs across all 50 states from 12 offices in 7 states, Missouri included.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
