DENTAL PATIENT RECEIVABLES · CAPABILITIES OVERVIEW

Receivables Recovery for Dental Practices

Recovering unpaid patient balances and insurance shortfalls — on pure contingency, with the discretion your patients expect

Prepared for **Sweet Family Dentistry** · August 2026

A recovery partner for the balances your team has stopped chasing

To Dr. Yip and the Sweet Family Dentistry team — thank you for reaching out. In a practice built on families who come back year after year, the hardest dollars to collect are the ones owed by patients you genuinely like: the co-pay after insurance paid less than expected, the treatment plan balance that got away, the family who stopped answering the phone.

Unpaid patient balances aren't a front-desk problem — they're a revenue-cycle problem. Your team is staffed to run chairs, not to chase a balance for nine months. Every account that ages ties up money you have already earned.

Southwest Recovery Services is an outsourced receivables recovery partner working healthcare and patient balances on **pure contingency since 2004**. You place accounts through a secure portal that takes your practice-management export, and we work them. No recovery, no fee.

Two decades of healthcare recovery — nationwide

A track record built on patient-balance recovery and a documented, compliant process — the follow-up capacity of a much larger billing department, without adding a single hire.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

The questions a practice owner actually asks

You told us you are looking at third-party collections with balances running 61–90 days out. Here is exactly how that works.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate is set once we see a representative sample of your aging; a 0–90 day book earns a better rate than a book of two-year-old balances.
2. How patients are treated	This is the first thing most practice owners want answered, and rightly so. Every contact is compliant, documented and calm — no threats, no misrepresentation, no pressure tactics. Your patients are your livelihood; a recovery partner who damages that relationship has cost you more than the balance was worth.
3. Insurance vs. patient responsibility	We separate the two before working anything. A balance unpaid because a claim was underpaid, denied or never worked is an insurance follow-up problem, not a patient one — and we can work the payer side as well.
4. Disputed balances	A dispute pauses recovery, it does not end it. We validate against the paper — treatment plan, financial policy, EOB, ledger — and speak with both sides. Good documentation usually resolves it in 30–60 days.
Onboarding & placement	Low-lift. Export your aging from Dentrix, Eaglesoft, Open Dental or whatever you run, upload it through the portal, and we map your columns — no re-keying. Outreach begins within 24–48 hours of a documented placement.

**THE SWRS CLIENT
PORTAL**

Practice-management-ready intake, with full visibility

Every placement runs through our secure portal — built to take your practice-management aging export and give you live, self-service access throughout recovery.

AGING-EXPORT PLACEMENT

Upload straight from Dentrix, Eaglesoft, Open Dental or your PM system — we map your columns, no re-keying.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — live status on every placed balance.

SECURE FILE EXCHANGE

Send treatment plans, signed financial policies, EOBs and ledgers safely inside the portal — the documentation that settles a dispute fast.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly at your front desk, so balances stay accurate and nobody is contacted after they have already paid.

SWRS Dental Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's dental book, anonymized and sized to a single-location practice. The spread is shown honestly, low results included — recovery tracks the age of the balance more than anything else. Your 0–90 day aging sits at the favourable end of this range.

GENERAL DENTAL PRACTICE

Single-location, DFW

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

**WHY PLACEMENT TIMING
DECIDES THE OUTCOME**

The same balance is worth several times more at 90 days than at 24 months

You told us your accounts run 61–90 days out — the most useful fact on your webform, because recovery tracks age more closely than any other variable. A balance placed while the patient still recognises the treatment resolves at a materially higher rate.

THE AGE CURVE

Fresh balances (under ~90 days) recover at multiples of what a two-year-old account returns — the last two case studies above are the same service, placed years apart.

THE STANDING RULE

A fixed “place at 90 days” policy recovers materially more than letting balances drift toward write-off — and on contingency there is no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

We speak your ledger

A dental book has a specific recovery profile — small balances, high volume, and patients you want back in the chair. Our playbook is built for exactly that.

Patient balances after insurance

Co-pays, deductibles and treatment-plan balances left after the claim settles — worked with the discretion a family practice requires.

Insurance follow-up, not just collections

Underpaid, denied and never-worked claims chased on the payer side, so you are not pursuing a patient for money an insurer owes.

High-volume, small-balance books

Hundreds of modest balances is the profile automation handles best — consistent, documented contact at a cost that still makes sense on a \$400 account.

Patients you want to keep

Compliant, respectful contact designed to settle the balance without ending the relationship — most patients pay once someone finally asks clearly.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that returns more of each aging balance and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. He became convinced the industry's bad reputation was a choice, not a requirement.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person. Two decades later he still coaches the teams and works accounts personally.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

In a family practice, a past-due patient today can be a paying patient tomorrow — so recovery stays professional, protecting the reputation Dr. Chan and Dr. Yip have built in Rowlett since 2017.
