SELF-STORAGE RECEIVABLES RECOVERY • CAPABILITIES OVERVIEW

# Debt Collection for Self-Storage Operators

Recovering delinquent rent & post-lien-sale deficiency balances — on pure contingency

Prepared for **StoragePRO** • July 2026

## A recovery partner for the balances that outlast the lien sale

To Nicholas and the StoragePRO team — thank you for reaching out. Managing self-storage across a large, multi-state portfolio means running the statutory lien process again and again — and the balance doesn't end at the auction. After a unit is sold, the tenant still owes the shortfall, late fees and lien costs, and plenty of accounts go delinquent long before they ever reach sale.

**Storage deficiency balances aren't a site-manager problem — they're a portfolio cash-flow problem.** Delinquent monthly rent and post-lien-sale deficiency balances quietly age into write-offs across dozens of facilities while your managers focus on occupancy, not chasing former tenants.

Southwest Recovery Services works self-storage receivables on **pure contingency since 2004** — a single recovery partner across your managed portfolio. We locate former tenants with skip tracing and pursue the balance **reputation-first** and fully compliant. Consumer accounts are worked under FDCPA / Reg F in the states where permitted; commercial and business-tenant balances are worked nationwide. You place through a secure portal. No recovery, no fee.

## Two decades of receivables recovery — nationwide

A documented, compliant recovery process a multi-facility management company can standardize across every site and owner — one partner, one portal, consistent handling from Arizona to New York.

## The questions a storage operator asks — answered directly

Exactly how we work, in plain terms, before a single account is placed.

| YOUR QUESTION                                              | SOUTHWEST RECOVERY SERVICES                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Fee structure</b>                                    | Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your A/R.                                                                                                                                                                 |
| <b>2. Post-lien-sale deficiency balances</b>               | The shortfall a tenant still owes after their unit is auctioned — plus late fees and lien / advertising / auction costs — validated against your lien file and pursued professionally. This is the balance most operators write off, and it's exactly what we work.                                                                                                                                                           |
| <b>3. Consumer vs. commercial — and the state question</b> | Both. Individual storage tenants are consumer accounts, worked under FDCPA / Reg F in states where permitted. In candor: SWRS does not collect <b>consumer</b> debt in California, Oregon or Washington — but your portfolio spans AZ, CO, CT, GA, ME, MA, NV, NY, PA and more, where consumer balances are collectible, and <b>commercial / business-tenant</b> balances are collectible in every state, including CA/OR/WA. |
| <b>4. Former tenants who've moved</b>                      | Skip tracing on the former tenant and any listed alternate contact / lienholder — then persistent, documented contact. Once a tenant vacates a unit, locating them is exactly where an outside agency outperforms a site office.                                                                                                                                                                                              |
| <b>5. Onboarding &amp; placement</b>                       | Low-lift and portfolio-friendly. Export a delinquency / lien / A/R report from your management platform (SiteLink, storEDGE / Storable, DoorSwap, or a spreadsheet) and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.                                                                                                                |

## Platform-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your delinquency / lien export and give your corporate team live, self-service visibility across the whole portfolio.

### PLATFORM-READY PLACEMENT

Upload a delinquency / lien / A/R export from SiteLink, storEDGE / Storable or a spreadsheet — we map your columns, no re-keying, at portfolio scale.

### REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's recovered across every facility and owner.

### SECURE FILE EXCHANGE

Send lease agreements, lien notices, auction records and ledgers safely inside the portal — the documentation that makes a deficiency balance defensible.

### DIRECT-PAYMENT REPORTING

Log payments a tenant makes directly to a site, so balances stay accurate and no one is over-contacted.

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

## THE COST OF WAITING

# Why storage balances recover best while they're fresh

A storage balance is most collectible while it's fresh — the tenant's contact and employment details are current, the lien file is complete, and the account is recent. Every month it ages, people relocate, numbers change, and the trail goes cold. The highest-leverage move a portfolio operator can make isn't chasing harder — it's placing sooner, consistently, across every site.

### THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates; deficiency balances left a year or more after auction collect a fraction of that.

### THE STANDING RULE

A standardized “place at 90 days” policy across the portfolio recovers more than letting each site's balances drift toward write-off — and on contingency there's no cost to placing.

*Real placed-versus-recovered results from SWRS's storage, rental and recurring-billing book, anonymized by sub-sector; individual client names withheld. Storage deficiency balances vary widely by lien documentation, account age and tenant type; we give an honest, age-based read on a representative sample first.*

## We understand a storage ledger

A multi-facility, multi-state management portfolio creates a specific receivables profile. Our playbook is built for exactly that.

### Post-lien-sale deficiency balances

The shortfall, late fees and lien costs a tenant still owes after auction — validated against the lien file and recovered, not written off.

### Delinquent monthly rent

Accounts that fall behind before they ever reach sale — worked early, while the tenant is still locatable and the balance is fresh.

### Consumer & commercial, multi-state

Consumer tenants worked under FDCPA / Reg F where permitted; commercial and business-tenant balances worked nationwide — one partner across the whole portfolio.

### Skip tracing & reputation-first

We locate tenants who've vacated and pursue professionally — protecting the reputation of every facility and owner you manage.

## Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

### AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

### Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

### Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

### Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

### API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

### Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

## Built by a collector with 30 years on the phones — not a CEO with zero collection experience

### Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
