

Providing Creative Solutions to Common Problems

SENIOR-CARE & SKILLED-NURSING RECEIVABLES · CAPABILITIES OVERVIEW

Debt Collection for Senior Care

Recovering resident A/R — private-pay balances, Medicaid-pending gaps & responsible-party obligations — on pure contingency

Prepared for **Seven Acres Jewish Senior Care Services** · July 2026

A recovery partner for the resident balances that age out

To Stephanie Heitman and the Seven Acres business office — for more than 80 years Seven Acres has cared for Houston’s seniors as a mission-driven, not-for-profit community. The hardest dollars a community like yours collects are the resident balances that linger after the care is delivered: private-pay balances, the Medicaid-pending gap, Medicare co-insurance, and responsible-party obligations that go quiet once a resident is discharged.

Aged resident A/R isn’t a business-office problem — it’s a mission problem. For a not-for-profit senior-care community, every dollar recovered from a written-off resident balance is a dollar back toward care — and on a Medicare / Medicaid / private-pay book, those balances add up quickly across a 100+-bed census.

Southwest Recovery Services works patient and resident receivables on **pure contingency since 2004** — licensed and bonded where required, including Texas, and HIPAA-aware in how we handle resident information. Recovery is **dignity-first**: firm, professional, and respectful of the resident, the family, and the Seven Acres name. You place accounts through a secure portal that takes a resident-A/R aging export, and we work them. No recovery, no fee.

Two decades of receivables recovery — nationwide

A documented, compliant recovery process a senior-care business office can plug in without adding billing headcount — and without putting a mission-driven reputation at risk.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

The questions a business office asks — answered directly

Exactly how we work, in plain terms, before a single resident account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your resident A/R.
2. Will this protect our reputation and families?	This matters most for a mission-driven, community-rooted nonprofit — and it's how we're built. Recovery is dignity-first and fully compliant: no threats, no misrepresentation. We represent Seven Acres professionally with residents and responsible parties alike, protecting your name in the Houston community while we recover the balance.
3. Compliance & resident data	FDCPA, Reg F, and TCPA guardrails on every account, and HIPAA-aware handling of any resident information you place. Licensed and bonded where required, including Texas. Every contact is documented and defensible.
4. What to place — and when	Private-pay resident balances, the Medicaid-pending gap (care billed before eligibility is approved, or applications that lapse/deny), Medicare Part A co-insurance (days 21–100) and non-covered days, responsible-party / family obligations, and balances left when a resident is discharged. Place at roughly 90 days — the earlier a balance is placed, the more of it we recover.
5. Onboarding & placement	Low-lift. Export a resident-A/R aging report from your system (PointClickCare, MatrixCare, or similar) or a simple spreadsheet, and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.

Aging-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your resident-A/R export and give your business office live, self-service visibility throughout recovery.

AGING-READY PLACEMENT

Upload a resident-A/R aging export from PointClickCare, MatrixCare or your system — we map your columns, no re-keying.

SECURE, HIPAA-AWARE EXCHANGE

Send statements, ledgers and responsible-party documentation safely inside the portal — the paper that resolves questions fast, handled with care.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's been recovered against your placements.

DIRECT-PAYMENT REPORTING

Log payments a resident or family makes directly to Seven Acres, so balances stay accurate and no one is over-contacted.

SWRS Healthcare & Senior-Care Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's healthcare book, anonymized by sub-sector and led by senior-care and skilled-nursing placements — a segment we work a great deal of. Resident and patient A/R behaves differently than commercial debt: balances are smaller, older, and harder to locate, which is exactly why placing early matters.

THE COST OF WAITING

Why resident balances recover best while they're fresh

A resident balance is most collectible while it's fresh — while the resident is still in-house or recently discharged and contact and responsible-party details are current. Every month it ages, families scatter, memories fade, and the balance competes with newer bills. The highest-leverage change a business office can make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates; balances left a year or more — especially after discharge — collect a fraction of that.

THE STANDING RULE

A simple “place at 90 days” policy recovers more than letting resident balances drift toward write-off — and on contingency there's no cost to placing.

Recovery rates vary by portfolio age, balance size, payer type and documentation. SWRS gives an honest, age-based read on a representative sample before any accounts are worked. Figures are anonymized from SWRS's healthcare book; individual client names withheld.

We understand a senior-care ledger

A Medicare / Medicaid / private-pay resident book creates a specific receivables profile. Our playbook is built for exactly that.

Private-pay resident balances

Monthly room-and-board and ancillary balances that fall to the resident or family — pursued professionally while they are still collectible.

The Medicaid-pending gap

Care delivered before eligibility is approved — and applications that lapse or deny — leave stranded balances. We recover the portion that becomes resident or responsible-party debt.

Co-insurance, non-covered & discharged

Medicare Part A co-insurance (days 21–100), non-covered days, and balances that go quiet once a resident is discharged — the hardest to collect in-house, and exactly what we work.

Dignity-first & HIPAA-aware

Empathetic, compliant contact with residents and responsible parties that protects a mission-driven, community-rooted nonprofit's name.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
