HEAVY TRUCK & EQUIPMENT REPAIR · COMMERCIAL RECEIVABLES · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

Recovering unpaid repair orders, road-service calls and fleet invoices — on pure contingency

Prepared for **Miller Equipment & Truck Repair LLC** · August 2026

For the repair orders that leave the shop and never get paid

To the owner of Miller Equipment & Truck Repair — you run 24/7 emergency and mobile service out of Jeromesville for carriers who are, by definition, on the move. The truck gets fixed, the driver gets back on the road, and some percentage of those invoices never come back. That is the hardest receivable in the trades to collect, and it is not because of anything your shop did wrong.

Roadside and mobile work carries the worst collection profile in commercial repair. You extend credit at 2 a.m. on the shoulder of a highway, to a driver you have never met, for a carrier that may be domiciled three states away. The parts and the labor are already spent before anyone talks about terms. When that invoice ages, the truck is long gone and so is your leverage.

Southwest Recovery Services is an outsourced receivables recovery partner working commercial trade AR on **pure contingency since 2004**, with recovery reach across all 50 states. You place accounts through a secure portal that takes an export or a simple spreadsheet of open invoices, and we work them — including the out-of-state carriers you have no practical way to chase from a shop in Ashland County. No recovery, no fee.

Two decades of commercial recovery — nationwide

Your customers do not stay inside Ohio, so your recovery partner cannot either. SWRS works commercial receivables in all 50 states, which is what it takes to reach a carrier that broke down on I-71 and is now sitting in a yard in Texas.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

Commercial & B2B trade AR since 2004

Nationwide — all 50 states

Skip tracing on carriers, DOT/MC numbers & principals

Mechanic's & possessory lien accounts worked

Contingency — no recovery, no fee

The questions a shop owner actually asks

Straight answers, in the order they usually come up in the bay.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
What does it cost?	Pure contingency — \$0 upfront, no retainer, no monthly minimum, no per-account fee. You pay an agreed percentage only of what we actually recover. If we collect nothing on an account, you owe nothing on it. The rate is set against the age, size and volume of what you place; we quote it once we have seen a representative sample of your open invoices.
How small is too small to place?	There isn't a floor that matters for a shop your size. A \$1,400 road-service call and a \$22,000 engine job get the same intake and the same documented process — contingency means the economics work on both. Most independent shops place in small batches as invoices cross 60 or 90 days rather than waiting to accumulate a big file.
The carrier is out of state and won't answer.	This is the core of the work. We run commercial skip tracing on the operating entity, its DOT and MC registrations, successor entities and the principals behind it — then apply persistent, compliant multi-channel outreach. A demand from a third-party recovery firm resolves a meaningful share of accounts that have simply gone quiet on the shop.
They say the repair was wrong or the bill was too high.	A dispute pauses recovery, it doesn't end it. We validate the account against your paper — the signed repair order or work authorization, the parts invoices, tech notes, photos and the text or call trail with the driver or dispatcher. In heavy-truck work the signed authorization and the parts documentation are usually decisive. Dispute investigation typically adds 30–60 days.
What do I have to send you?	Less than most owners expect. An export or spreadsheet of open invoices with the customer name, address, phone, invoice number, date and balance is enough to start. Repair orders, authorizations and parts detail get uploaded per account as needed — you do not need to assemble a file before you place. Outreach begins within 24–48 hours of a documented placement.
Will this cost me the customer?	Some of these carriers you want back and some you don't — you tell us which. Recovery is firm and professional, never threatening or misleading, and you can flag any account as relationship-sensitive so we handle it accordingly. Your 4.9-star reputation in Jeromesville is an asset we are not going to spend for you.

**THE SWRS CLIENT
PORTAL**

Place an invoice in minutes, see everything after that

Every placement runs through our secure portal — built so a shop without a back office can place accounts and check status without phone tag.

SPREADSHEET-READY PLACEMENT

Upload an export or a plain spreadsheet of open invoices — we map your columns, so there is no re-keying and no special software.

SECURE DOCUMENT UPLOAD

Send repair orders, signed authorizations, parts invoices and photos safely per account — the paper that shuts a dispute down fast.

REAL-TIME REPORTING

Check status and recovery on any account on demand, at 6 a.m. or after close — no waiting for a monthly statement.

DIRECT-PAYMENT REPORTING

Log payments a customer makes straight to the shop, so balances stay accurate and nobody gets contacted over money you already have.

33% recovered

TIRE & AUTOMOTIVE SERVICE

Multi-bay tire & auto

\$9.6K recovered

of ~\$61.6K assigned

16% recovered

Anonymized by sector from Southwest Recovery’s commercial book; client names withheld. The spread above is real and deliberate — the 16% result was an older, higher-count book placed late, and the 60–63% results were smaller batches placed while the invoices were still fresh. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

WHY THE SPREAD LOOKS LIKE THAT

Age is the single biggest variable in a repair-order book

Look at the range on the cards above and the pattern is not random. The shops that recovered 54–63% placed small batches of relatively fresh invoices. The 16% result came from a large file of balances that had already been chased in-house for a year. Nothing about the shops differed much — the timing did.

THE AGE CURVE

A repair order under ~90 days past due often resolves in 30–60 days. The same invoice at 12 months collects a fraction of that, because the carrier has moved, re-registered, or in some cases stopped operating entirely.

THE STANDING RULE

A fixed “place it at 90 days” habit recovers materially more than letting invoices drift toward write-off. On contingency there is no cost to placing early — the only thing waiting protects is the write-off.

SWRS gives an honest, age-based read on a representative sample before any accounts are worked. If your open file is mostly 12 months and older, we will tell you it behaves like the low end of that range rather than let you read 60% off the top card.

We know what a repair order is worth

A truck and equipment repair book has a recovery profile all its own — mobile debtors, interstate carriers, and paper that lives on a clipboard. The playbook is built for exactly that.

Interstate carriers & owner-operators

Commercial skip tracing against DOT and MC registrations, operating authority, successor entities and the principals behind them — the tools to find a carrier that left Ohio and never called back.

Emergency & roadside invoices

The 2 a.m. call you took on faith, with no credit application and no PO. We work these on the strength of your authorization, dispatch record and parts trail.

Disputed repair orders

Documentation-driven validation — signed work authorizations, tech notes, photos and parts invoices — that separates a real warranty question from a stall.

Every balance in the shop

Repair orders, road service and towing calls, DOT inspection and PM billing, welding and fabrication work, trailer and liftgate jobs, and fleet accounts on terms — one partner, one portal.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. He became convinced the industry's bad reputation was a choice, not a requirement.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. He still coaches the teams and works accounts personally.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

A shop's reputation in a small town is worth more than any single invoice. Recovery has to stay firm but professional — no threats, no misrepresentation. That protects the customers you want back.
