Providing Creative Solutions to Common Problems

COMMERCIAL EQUIPMENT & SERVICE RECOVERY · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

Recovering past-due equipment, installation and service-contract receivables for Fit Supply — on pure contingency

Prepared for **Fit Supply** · August 2026

01 — INTRODUCTION

A recovery partner for the invoices your team can’t keep chasing

Prepared for Fit Supply — 18+ years, 50+ equipment manufacturer partners, four distribution centers, 30+ installation partners and projects in all 50 states. At that scale the receivable is never just one invoice: it is a project balance, an installation draw and a recurring preventative-maintenance contract, billed across fitness centers and gyms, multifamily and apartment communities, hotels, corporate campuses, schools, police and fire stations and municipal rec centers — and every one of them pays on its own calendar, through its own procurement office. A book that wide produces a long tail of small, recurring service invoices no internal AR desk has the hours to chase.

Money past terms is still money you earned. Every month a receivable ages, contact data goes stale and leverage erodes — and a finance team sized for closing the books can only chase so far before the cost of collection outweighs the balance. That is true of a stalled equipment or installation balance and of a monthly PM contract that quietly stopped paying — and across a nationwide install base, the quiet ones add up faster than the loud ones.

Southwest Recovery Services works commercial receivables on **pure contingency since 2004**, nationwide across all 50 states. You place accounts through a secure portal that takes your AR aging export — we map your columns, so there is no re-keying — and we work them. No retainer, no minimum, no recovery, no fee.

02 — AT A GLANCE

Two decades of commercial recovery — nationwide

A track record built on high-volume B2B receivables and a documented, professional process — capacity your finance team can plug in without hiring for it.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked
51% of matured client portfolios see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

03 — YOUR QUESTIONS, ANSWERED

What a controller asks us — answered directly

The questions that matter when the book is equipment, installation and recurring service contracts sold into procurement offices that each pay on their own cycle.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
What does it cost?	Pure contingency — $0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. Commercial contingency scales with the age, balance and volume of your placements; we quote your rate once we see a representative sample of your aged AR.
Which balances should we place?	Anything past terms that has stopped moving — post-installation project balances, repair invoices, and preventative-maintenance contracts that quietly lapsed. The 90-plus bucket is where internal effort stops paying for itself and third-party recovery starts.
What about a disputed installation or equipment charge?	A dispute pauses recovery — it doesn't end it. We validate the account against your paper: the quote, the purchase order, the delivery ticket and the signed installation sign-off. That documentation trail is unusually strong evidence in commercial recovery, and it separates a genuine dispute from a stall. Dispute investigation typically adds 30–60 days.
The community changed property managers — who owes us now?	Commercial skip tracing locates the operating entity, successors and principals behind a club that sold, a community that changed management, or a facility that went quiet after a rebrand — so the balance stays attached to the obligor instead of aging into a write-off.
How do we hand accounts over?	Bulk-upload an AR aging export from your accounting system through the portal; we map your columns, so nothing gets re-keyed. Outreach begins within 24–48 hours of a documented placement, and you can run reports and log direct payments yourself at any time.
Is this consumer debt collection?	No. Your receivables are commercial, business-to-business balances, so the FDCPA's consumer restrictions do not govern them. We still work every account under a documented, professional process — ACA International member, clean compliance record since 2004 — because the delinquent service customer is often next year's equipment buyer.

THE SWRS CLIENT PORTAL

Accounting-system-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your AR aging exports and give your finance team live, self-service access throughout recovery.

AGING-EXPORT-READY PLACEMENT

Upload an AR aging export from your accounting system — we map your columns, so nothing is re-keyed.

SECURE FILE EXCHANGE

Send quotes, purchase orders, delivery tickets, installation sign-offs and service agreements safely inside the portal — the documentation that resolves disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of your aged AR instead of a monthly PDF.

DIRECT-PAYMENT REPORTING

Log payments a customer makes straight to Fit Supply, so balances stay accurate and no one is over-contacted.

THE DSO ADVANTAGE

Why fresh commercial invoices recover best

A commercial balance is most collectible while it's fresh; every month it ages, contact data goes stale and leverage erodes. The highest-leverage change most finance teams make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh accounts (under ~90 days past due) often resolve in 30–60 days; balances that sit a year collect a fraction of that.

THE STANDING RULE

A fixed "place at 90 days" policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR YOUR BOOK

We speak your ledger

An equipment, installation and service-contract book spanning gyms, apartment communities, hotels, municipal facilities and corporate campuses in all 50 states has a specific recovery profile. Our playbook is built for it.

Equipment & installation balances

Recovering project and delivery invoices that slipped past terms — validated against your quote, purchase order, delivery ticket and signed installation sign-off.

Service & PM contract billing

Monthly, bi-monthly and quarterly preventative-maintenance and repair invoices — the long tail that is small individually and material in aggregate.

Ownership & management turnover

Locating clubs, management companies, municipalities and principals after a sale, rebrand or property-manager change — so the balance follows the obligor.

All 50 states, one partner

You operate nationwide; so do we. Recovering in all 50 states from 12 offices in 7 states — no state-by-state vendor patchwork.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
