Recovering past-due field-ticket and chemical-program invoices — on pure contingency

Prepared for **Perfex Chemical Solutions** · August 2026

A recovery partner for the invoices that outlive the job

To the Perfex Chemical Solutions finance team — in oilfield chemical services the hardest dollars to collect are the ones already pumped. Production, transport and disposal chemistry goes out on net terms to E&P, midstream and water-management operators, and then the invoice lands in a payables queue that moves at the operator's pace. Field tickets get questioned, JIB splits and non-operated partners stall approvals, and when a customer sells an asset or leaves a basin, the balance ages past the point a field-based billing team can realistically chase it.

Past-due chemical-program invoices aren't a field problem — they're a working-capital problem. Product, freight and labor are already spent. Every month that balance drifts past terms, contact data goes stale, the people who signed the ticket move on, and leverage erodes.

Southwest Recovery Services is a commercial, B2B-focused collection agency working business receivables on **pure contingency since 2004**, with recovery reach across all 50 states. We've collected millions of dollars in industries just like yours since 2004. You place accounts through a secure portal that takes your AR aging export, and we work them. No recovery, no fee.

Two decades of commercial recovery — nationwide

A track record built on high-volume B2B receivables and a documented, compliant process — scale a multi-basin billing team can plug into without hiring for it.

The questions an oilfield services CFO asks — answered directly

What matters for a chemical-program receivables book spread across operators, basins and field locations.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. Contingency scales with the age, balance and volume of your placements; we quote once we see a representative sample.
2. Disputed field tickets	A dispute pauses recovery — it doesn't end it. We validate the account against the paper: the signed field ticket or delivery receipt, the pricing agreement or MSA, the itemized invoice, and the communication trail. In chemical services the signed ticket and the pricing sheet are usually decisive.
3. Operators who go quiet	The core of what we do: compliant multi-channel outreach, commercial skip tracing to locate the operating entity, successors and principals behind a company that has gone silent or rolled its assets, and review of legal escalation for accounts that still won't engage.
4. Onboarding & placement	Fast and low-lift. Bulk-upload an AR aging export from your accounting system through our portal; we map your columns, so there's no re-keying. Outreach begins within 24–48 hours of a documented placement. We also handle outsourced AR management and insurance follow-up if you want aging worked before it reaches placement.

AR-export-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your AR aging exports and give your billing team live, self-service access throughout recovery.

AR-EXPORT-READY PLACEMENT

Upload an aging export from your accounting system — we map your columns, no re-keying, no new workflow for the field.

SECURE FILE EXCHANGE

Send signed field tickets, pricing agreements, MSAs, invoices and statements safely inside the portal — the documentation that resolves disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand, by operator or by basin — a live dashboard instead of a monthly PDF.

DIRECT-PAYMENT REPORTING

Log payments an operator makes directly to Perfex, so balances stay accurate and no customer is over-contacted.

THE DSO ADVANTAGE**Why fresh field-ticket invoices recover best**

A commercial balance is most collectible while it's fresh; every month it ages, contact data goes stale, the people who signed the ticket move on, and leverage erodes. The highest-leverage change most billing teams make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh accounts (under ~90 days past due) often resolve in 30–60 days; balances that sit a year collect a fraction of that.

THE STANDING RULE

A fixed “place at 90 days” policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

We speak your ledger

A chemical-program receivables book spread across operators and basins has a specific recovery profile. Our playbook is built for exactly that.

Operators who have gone quiet

Commercial skip tracing on the operating entity, its successors and its principals, plus persistent compliant outreach for customers who stopped responding after the chemistry was delivered.

Disputed & contested field tickets

Documentation-driven validation — signed tickets, pricing agreements, MSAs, delivery receipts — that separates a genuine dispute from a stall tactic.

Every commercial balance type

Chemical-program invoices, freight and equipment charges, technical and laboratory service fees, rental and standby — one partner, one portal.

Multi-basin, nationwide reach

Recovery across all 50 states from 12 offices in 7 states — every Perfex service point worked under one relationship.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
