

DENTAL PATIENT RECEIVABLES · CAPABILITIES OVERVIEW

Debt Collection for Dental Practices

Recovering past-due patient balances — implants, cosmetic & treatment-plan receivables — on pure contingency

Prepared for **Refined Smiles** · July 2026

A recovery partner for the balances patients leave behind

To Dr. Kapers and the Refined Smiles team — thank you for requesting a quote. As a growing Cave Creek practice built around implants, cosmetic, and comprehensive care, the hardest dollars you'll collect are the large self-pay and after-insurance balances patients stop paying once the treatment is finished and the visit is behind them.

Past-due patient balances aren't a front-desk problem — they're a cash-flow problem. A full-arch implant, aligner, or cosmetic case can leave a \$3K–\$50K patient responsibility that quietly ages into a write-off while your team is focused on the chair, not the phone.

Southwest Recovery Services works patient receivables on **pure contingency since 2004** — licensed and bonded where required, including Arizona, and HIPAA-aware in how we handle patient information. You place accounts through a secure portal that takes a patient-A/R aging export from your practice-management system, and we work them. No recovery, no fee.

Two decades of receivables recovery — nationwide

A documented, compliant recovery process a growing practice can plug in without hiring a billing or collections person — and without putting your name at risk.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

ACCREDITED & RECOGNIZED

The questions a practice asks — answered directly

You asked for a quote; here is exactly how we work, in plain terms, before a single account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your patient A/R.
2. Will this hurt my reputation with patients?	This matters most in a community practice, and it's how we're built. Recovery is empathy-first and fully compliant — no threats, no misrepresentation. We represent Refined Smiles professionally, so a past-due patient today can still be a returning patient tomorrow. Protecting your name is part of the job, not an afterthought.
3. Compliance & patient data	FDCPA, Reg F, and TCPA guardrails on every account, and HIPAA-aware handling of any patient information you place. Licensed and bonded where required, including Arizona. Every contact is documented and defensible.
4. What to place — and when	Self-pay balances, the patient-responsibility portion left after insurance, denied or maxed CareCredit applicants, and broken in-house payment or membership-plan balances. Place at roughly 90 days past due — the earlier a balance is placed, the more of it we recover.
5. Onboarding & placement	Low-lift. Export a patient-A/R aging report from your practice-management system (Dentrix, Eaglesoft, Open Dental, Curve, and others) or a simple spreadsheet, and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.

PMS-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your patient-A/R export and give your front office live, self-service visibility throughout recovery.

PMS-READY PLACEMENT

Upload a patient-A/R aging export from Dentrix, Eaglesoft, Open Dental or your PMS — we map your columns, no re-keying.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's been recovered.

SECURE, HIPAA-AWARE EXCHANGE

Send statements and account documentation safely inside the portal — the paper that resolves questions fast, handled with care.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to the practice, so balances stay accurate and no one is over-contacted.

SWRS Healthcare Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's healthcare book, anonymized by sub-sector. Patient A/R behaves differently than commercial debt — balances are smaller, older, and harder to locate, which is exactly why placing early matters.

THE COST OF WAITING

Why patient balances recover best while they're fresh

A patient balance is most collectible while it's fresh. Every month it ages, contact details go stale, the visit fades from memory, and the balance competes with newer bills. The highest-leverage change a practice can make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates; balances left a year or more collect a fraction of that.

THE STANDING RULE

A simple “place at 90 days” policy recovers more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Recovery rates vary by portfolio age, balance size and documentation. SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

We understand a dental ledger

A practice built on implants, cosmetic, and financing plans creates a specific patient-A/R profile. Our playbook is built for exactly that.

Large treatment-plan balances

High-dollar self-pay balances from implants, full-arch, veneers, aligners and sedation cases — pursued professionally after treatment is complete.

After-insurance patient responsibility

The portion insurance didn't cover is often where the real leakage is. We recover the patient balance without straining your front office.

Denied financing & broken plans

CareCredit denials and defaulted in-house membership or payment-plan balances become self-pay A/R — we work exactly those.

Reputation-first & HIPAA-aware

Empathetic, compliant contact that protects a community practice's name and keeps complaints low.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
