Providing Creative Solutions to Common Problems

DENTAL & PATIENT-BALANCE RECEIVABLES · CAPABILITIES OVERVIEW

Receivables Recovery for Dental Practices

Recovering the aged patient balances your front desk can't — on pure contingency

Prepared for **Blossom Dental and Facial Aesthetics** · September 2026

01 — INTRODUCTION

A recovery partner for the balances your team has already worked

To Genesis and the Blossom Dental team — you already run a disciplined in-house process: patient statements and 30-, 60- and 90-day notices. The accounts that survive all of that are the hardest dollars in dentistry — patients who've stopped responding, moved on, or simply decided not to pay after treatment was delivered.

Because you place only after your internal 30/60/90 cycle is exhausted, the accounts you'd send us are already seasoned. Seasoned patient balances recover toward the lower end of the range, not the top — we'd rather tell you that up front than let a headline number set the wrong expectation.

Southwest Recovery Services is a patient-balance AR recovery partner working healthcare receivables on **pure contingency since 2004**, HIPAA-ready and built to pick up exactly where your front desk leaves off. You place accounts through a secure portal that takes your Open Dental aging export, and we work them. No recovery, no fee.

02 — AT A GLANCE

Two decades of patient-balance recovery — nationwide

A track record built on dental and medical patient balances and a documented, compliant process — a recovery team a growing practice plugs into without hiring for it.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked
51% of matured client portfolios see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

03 — YOUR QUESTIONS, ANSWERED

Your questions — answered directly

Everything you asked, grouped and answered in order. Exact rates are quoted after we've seen a representative sample of your aging — never off a rate card, because the right number depends on the age and mix of what you place.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fees, minimums & contract	Pure contingency — $0 upfront, no setup or onboarding fee, no monthly fee, no monthly minimum, and no minimum number or dollar amount of accounts to submit. You pay a pre-agreed percentage only of what we actually recover. No long-term lock-in and no cancellation or termination fee — you can stop placing at any time. We quote your rate once we've reviewed a representative sample of your aging.
2. How the rate is set	The contingency rate reflects the age, balance and volume of what you place — fresher, larger, higher-volume books earn better rates. There is no fixed per-account fee. During scoping we'll advise a practical minimum balance worth placing, so you're not paying to chase dollars that cost more to work than they return.
3. Submitting accounts & Open Dental	Bulk-upload an aging export from Open Dental (CSV or spreadsheet) through our secure portal — we map your columns, so there's no re-keying. Documented placements begin working within 24–48 hours, and onboarding is typically a few business days from signed agreement to first outreach.
4. Portal, remittance & direct pay	You get a secure client portal to monitor every individual account and all recovery activity in real time. Recovered funds are remitted to the practice on a set monthly cycle with a full reconciliation statement. When a patient pays your office directly after placement, you log it in the portal so we stop contact immediately; because the account was placed, the agreed contingency applies to those payments too — standard, and it's what keeps patients from being over-contacted.
5. Payment plans, skip tracing & credit reporting	We set up patient payment arrangements directly — often the fastest path to recovery on a patient balance. Skip tracing to locate patients who've moved is included in the contingency, never billed separately. Where you choose to enable it, we report to Equifax and Experian after the FCRA / Reg F validation window, on confirmed and undisputed balances only.
6. Uncollectable accounts & legal	An account that resists the standard process can move to continued monitoring, credit-reporting leverage, or attorney review — nothing happens without your approval. Legal / attorney forwarding is available for qualifying balances; any court costs or attorney fees are disclosed and approved in advance, never a surprise. On accounts we simply can't collect, there is no fee — no recovery, no fee.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
7. Recall, HIPAA & what to expect	You can recall or withdraw an account at any time; a fee applies only where we've already collected or a payment arrangement is in place. We operate under a signed BAA with encrypted transfer, access controls and staff training for dental / healthcare data. Recovery tracks account age closely — fresh balances recover materially higher than seasoned ones — so we give you an honest, age-based read on a representative sample, plus a sample agreement and full fee schedule, before you commit.

THE SWRS CLIENT PORTAL

Account-level visibility and HIPAA-ready intake

Every placement runs through our secure portal — built to take your Open Dental exports and give your team live, self-service visibility on every patient account throughout recovery.

OPEN DENTAL-READY PLACEMENT

Upload an aging export from Open Dental — we map your columns, no re-keying.

SECURE, HIPAA-READY FILE EXCHANGE

Send statements, ledgers and documentation safely inside the portal, under a signed BAA.

REAL-TIME ACCOUNT MONITORING

See status and recovery activity on every individual account on demand — not a monthly PDF.

DIRECT-PAYMENT LOGGING

Log payments a patient makes to your office, so balances stay accurate and no one is over-contacted.

04 — CASE STUDIES

SWRS Dental & Patient-Balance Case Studies

Actual placed-versus-recovered results from Southwest Recovery's dental and patient-balance book, anonymized by practice. The spread is real — and because most dental books are placed only after months of in-house effort, the seasoned end of this range is the honest planning number, not the top.

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE AGE CURVE

Why the date you place matters more than the effort you spend

A patient balance is most collectible while it's fresh. Every month it ages, contact data goes stale, the relationship cools, and recovery odds fall. The highest-leverage change a practice can make isn't chasing harder — it's placing the accounts your team can't resolve sooner.

THE DECAY CURVE

Fresh patient balances (inside ~90 days) recover several times higher than balances left to sit past a year — a steep, well-documented drop.

A PRACTICAL OPTION

Many practices keep the full internal cycle on most accounts but place a first-pass tier earlier on clear non-responders — and on contingency there's no cost to placing.

Recovery varies by book; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR DENTAL PATIENT BALANCES

Turning worked-out patient balances back into practice revenue

The accounts that survive your statements and 30/60/90 notices need a different toolkit than a front desk has time for: locating patients who've moved, structuring arrangements, and applying compliant, documented pressure — without ever putting your practice's reputation at risk.

Non-responsive & relocated patients

Skip tracing to locate patients who've moved or gone silent, plus persistent multi-channel outreach your team doesn't have the hours for.

Disputed & contested balances

Documentation-driven validation — ledgers, treatment records, statements — that separates a genuine dispute from a stall.

Dignity-first patient contact

Firm, professional, FDCPA / Reg F-compliant outreach that protects the patient relationship and your reputation — no threats, no misrepresentation.

Nationwide reach, Florida included

Recovery across the U.S. from 12 offices in 7 states — patients who've moved out of Florida are still in reach.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that lifts recovery and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
