SWRS Southwest Recovery Services

*Providing Creative Solutions to Common Problems*

COMMERCIAL & B2B RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

# Debt Collection Agency for Businesses

## Recovering unpaid consulting, expert-witness and technical-services invoices — on pure contingency

Prepared for **Bryan Hauger Consulting** · September 2026

01 — INTRODUCTION

# A recovery partner for the invoices that go quiet after the work is done

To Jo Ann Hauger and the team at Bryan Hauger Consulting — in a team-based consulting model, the money leaves before it arrives. Your associates are paid for the failure analysis, the extrusion troubleshooting, the ASTM work, the deposition prep. The client pays on their own schedule. Every invoice that ages past terms is capital you have already spent.

**Professional-services receivables age differently.** A manufacturer disputes a shipment; a consulting client goes quiet. The project ends, the sponsoring engineer moves on, accounts payable has no context for the invoice, and a balance that was collectible at 60 days becomes a write-off at 18 months — usually without anyone ever refusing to pay.

Southwest Recovery Services is an outsourced commercial receivables recovery partner, working business-to-business balances on **pure contingency since 2004**, with recovery reach across all 50 states. You place accounts through a secure portal that takes your invoicing or AR-aging export, and we work them. No recovery, no fee.

02 — AT A GLANCE

# Two decades of commercial recovery — nationwide

A track record built on business-to-business receivables and a documented, compliant process — the back-office weight a lean consulting firm should never have to hire for.

03 — YOUR QUESTIONS, ANSWERED

# The five things to settle before you place a single account

Written for a B2B technical consultancy with project-based invoices, expert-witness engagements and clients spread across North America.

| YOUR QUESTION | SOUTHWEST RECOVERY SERVICES |
|---|---|
| **1. Fee structure** | Pure contingency — $0 upfront, no retainer, no monthly minimum, no setup cost to place. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age, balance and volume of what you place, and we quote it once we have seen a representative sample of your aging. Nothing is worked until you have agreed to the rate in writing. |
| **2. Disputed invoices & scope arguments** | The most common stall in consulting is not “we won’t pay” — it is “that wasn’t what we agreed to.” A dispute pauses recovery; it does not end it. We validate the balance against the paper: the engagement letter or SOW, the itemized invoice, time and deliverable records, and the email trail. For technical work, your reports, test data and correspondence are usually decisive. Dispute investigation typically adds 30–60 days. |
| **3. Clients who simply stop responding** | The core of what we do. Persistent multi-channel outreach, commercial skip tracing to locate the operating entity, its successors and the principals behind a business that has gone dark or reorganized, and review for legal escalation on accounts that still will not engage. A documented third-party demand on agency letterhead resolves a meaningful share of silent commercial accounts on its own. |
| **4. Placement & onboarding** | Low-lift. Bulk-upload an invoice or AR-aging export from QuickBooks, Xero, FreshBooks or a spreadsheet through the portal — we map your columns, so nothing is re-keyed. Outreach begins within 24–48 hours of a documented placement. Multiple divisions and d/b/a entities can be placed under one client relationship and reported together or separately. |
| **5. Geography & your brand** | Recovery reach is nationwide across all 50 U.S. states, which matches a client base spread across North America; international balances route through our legal-forwarding network case by case. Every contact is made in a manner consistent with a firm whose stated product is a satisfied client — compliant outreach, documented, with no threats and no misrepresentation. |

THE SWRS CLIENT PORTAL

## Accounting-system-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your invoicing or AR exports and give you live, self-service visibility throughout recovery, without an email chain.

### ACCOUNTING-SYSTEM-READY PLACEMENT

Upload an invoice or AR-aging export from QuickBooks, Xero or a spreadsheet — we map your columns, no re-keying.

### SECURE FILE EXCHANGE

Send engagement letters, SOWs, itemized invoices, reports and test data safely inside the portal — the documentation that closes a scope dispute fast.

### REAL-TIME REPORTING

Run and export account and recovery reports on demand, by division or across the whole book.

### DIRECT-PAYMENT REPORTING

Log payments a client makes directly to BHC, so balances stay accurate and no one is contacted twice.

04 — CASE STUDIES

# SWRS Commercial Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's commercial book, anonymized by sector and shown at the scale a professional-services firm actually places. The spread is real and it includes a poor result — recovery tracks the age and documentation of the file, not the promise in a pitch.

*Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.*

THE AGE CURVE

## Why the placement date matters more than the collector

A commercial balance is most collectible while the engagement is still fresh in the client's mind and the people who authorized it are still in their jobs. Every quarter it ages, the sponsoring contact leaves, the entity reorganizes, contact data goes stale, and leverage erodes. The highest-return change most firms make is not chasing harder — it is placing sooner.

### FRESH ACCOUNTS

Balances under roughly 90 days past due often resolve inside 30–60 days; an invoice that has sat a year collects a fraction of that — the low end of the range on the left.

### A STANDING RULE BEATS A JUDGMENT CALL

A fixed "place at 90 days" policy recovers materially more than deciding account by account, and on pure contingency there is no cost to placing an account that later pays you directly.

*Recovery figures vary by portfolio. SWRS gives an honest, age-based read on a representative sample before any account is worked.*

05 — BUILT FOR PROFESSIONAL-SERVICES & B2B RECOVERY

# Cutting the days between delivered and banked

Days Sales Outstanding measures one thing: how long completed work sits as a receivable before it becomes cash. Median B2B DSO runs about 43.5 days and the strongest quartile collects in roughly 25. For a consulting firm that pays its associates on delivery, every month past that is working capital financed out of the firm's own pocket.

### Silent and unreachable clients

Commercial skip tracing on the business, its successors and its principals, plus persistent multi-channel demand for clients who stopped responding when the project closed.

### Scope and value disputes

Documentation-driven validation — engagement letters, SOWs, deliverables, test data, the email trail — that separates a genuine dispute from a stall.

### Every division under one relationship

Pipe, packaging, injection molding, composites, metallurgy, expert-witness and the d/b/a entities — placed together, reported separately if you want it that way.

### Nationwide reach

Recovery across all 50 states from 12 offices in 7 states — matched to a client base spread across North America.

06 — AI-POWERED COLLECTIONS

# Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

### AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

### Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

### Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

### Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

### API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

### Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

# Built by a collector with 30 years on the phones — not a CEO with zero collection experience

**Steven Dietz**

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
