SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

B2B SAAS & SUBSCRIPTION RECEIVABLES · CAPABILITIES OVERVIEW

Debt Collection for SaaS & Software

Recovering lapsed renewals, unpaid subscription & enterprise invoices — on pure contingency

Prepared for **Bryq** · July 2026

01 — INTRODUCTION

A recovery partner for the invoices that go quiet after the value is delivered

To Markella and the Bryq team — thank you for reaching out. The hardest dollars a SaaS business collects are the ones a customer stops paying after the platform is already delivering value: annual renewals that lapse, subscription and usage invoices that age past terms, and enterprise accounts that go quiet once they've decided to churn.

Past-due receivables aren't a customer-success problem — they're a cash-flow and DSO problem. Every subscription or enterprise invoice that drifts past terms ties up ARR you've already earned and quietly becomes a write-off.

Southwest Recovery Services is a commercial, B2B-focused collection agency working business receivables on **pure contingency since 2004**, with recovery reach across 47 U.S. states. You place accounts through a secure portal that takes your billing / AR-aging export, and we work them. No recovery, no fee.

02 — AT A GLANCE

Two decades of commercial recovery — nationwide

A track record built on high-volume B2B receivables and a documented, professional process — scale a lean SaaS finance team can plug in without hiring for it.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked

03 — YOUR QUESTIONS, ANSWERED

Your questions — answered directly

Exactly how we work with a recurring-revenue receivables book, before a single account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — $0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. Commercial contingency scales with the age, balance and volume of your placements; we quote your rate once we see a representative sample of your U.S. receivables.
2. Disputed invoices	A dispute pauses recovery — it doesn't end it. We validate the account against the paper (order form / MSA, itemized invoices, usage / seat records, the communication trail) and speak with both sides. For SaaS, your order forms and product-usage logs are usually decisive.
3. Churned & non-responsive customers	The core of what we do: persistent multi-channel outreach, commercial skip tracing to locate the operating entity, successors and principals behind a business that's gone quiet, and review of legal escalation for accounts that still won't engage. A third-party demand on agency letterhead alone resolves a meaningful share.
4. Onboarding & placement	Fast and low-lift. Bulk-upload an AR / aging export from NetSuite, QuickBooks, Stripe or your billing system through our portal; we map your columns, so there's no re-keying. Outreach begins within 24–48 hours of a documented placement.
Geography & cross-border	Recovery reach is nationwide across 47 U.S. states. As Bryq is US-headquartered (St. Petersburg) with international roots and customers, we scope placements around your U.S. accounts first and handle international balances through our legal-forwarding network case by case.

THE SWRS CLIENT PORTAL

Billing-system-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your AR / billing exports and give your finance team live, self-service access throughout recovery.

BILLING-SYSTEM-READY PLACEMENT

Upload an AR / aging export from NetSuite, QuickBooks, Stripe or your billing system — we map your columns, no re-keying.

SECURE FILE EXCHANGE

Send order forms, MSAs, invoices and usage records safely inside the portal — the documentation that resolves disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live dashboard for your DSO and recovery.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to Bryq, so balances stay accurate and no one is over-contacted.

THE DSO ADVANTAGE

Why fresh SaaS invoices recover best

A commercial balance is most collectible while it's fresh; every month it ages, contact data goes stale and leverage erodes. The highest-leverage change most SaaS finance teams make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh accounts (under ~90 days past due) often resolve in 30–60 days — the 74–100% recoveries above; balances that sit a year collect a fraction of that.

THE STANDING RULE

A fixed "place at 90 days" policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Real placed-versus-recovered results from SWRS's B2B technology and professional-services book, anonymized by sub-sector; individual client names withheld. Results vary by account age, balance size and documentation quality; we give an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR SAAS & RECURRING REVENUE

We speak your ARR ledger

A recurring-revenue receivables book creates a specific recovery profile. Our playbook is built for exactly that.

Lapsed renewals & churned accounts

Annual renewals that quietly lapse and enterprise accounts that churn still owing — located with commercial skip tracing and worked with persistent, professional demand.

Subscription & usage invoices

Monthly / annual subscription, seat and usage-overage invoices that age past terms — validated against your order forms and usage logs.

Disputed & contested invoices

Documentation-driven validation — order forms, MSAs, usage records — that separates a genuine dispute from a stall tactic.

Nationwide U.S. reach

Recovery across 47 U.S. states from 12 offices in 7 states — built for a U.S.-wide SaaS customer base, with legal forwarding for international balances.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
