

Providing Creative Solutions to Common Problems

COMMERCIAL & B2B RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

Recovering unpaid consulting, implementation and project invoices — on pure contingency

Prepared for **Conveyance Solutions** · September 2026

For the one invoice that shouldn't have to cost you a relationship

Daniel — thanks for the time on Zoom. Conveyance has done something most professional-services firms never manage: ten years of ERP and Prophet 21 work for industrial distributors, and effectively one account that ever needed outside help. That is a remarkable collection record, and it changes what you should be looking for in a recovery partner.

When you place one account a decade, you are not buying volume — you are buying judgment. The risk on a single commercial placement is not the fee. It is a partner who works your client the way a high-volume consumer shop works a file, and costs you a reference in the distribution community you sell into.

Southwest Recovery Services is an outsourced receivables recovery partner working commercial B2B balances on **pure contingency since 2004**, with recovery reach across all 50 states. Commercial B2B receivables are business-to-business obligations, not consumer debt, so the account is worked as a business dispute between two companies — documented, professional, and quiet. No recovery, no fee.

Two decades of commercial recovery — nationwide

A track record built on B2B receivables and a documented, professional process — scale you can borrow for one account without building anything.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

What actually matters on a single-account placement

You are comparing options, so here is the straight version — including the part most agencies leave out.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. The rate you were quoted	30% is the number for a single, aged commercial account of this size, and it holds. Pure contingency — \$0 upfront, no retainer, no monthly minimum, no cancellation fee. Rate moves with age, balance and volume, so if the ~\$30K account materializes and the two are placed together, the blended rate comes down. Ask every agency you are talking to whether their quote carries a minimum fee per account; on a \$5K balance that detail matters more than the percentage.
2. How your client gets treated	This is the real question when you sell into a community as tight as industrial distribution. A commercial placement is worked as a documented business dispute — contract, statements of work, invoices, the communication trail — not as a consumer collection. No pressure tactics, no volume dialing. Everything is logged and defensible, and you can read the account activity yourself in the portal at any time.
3. Documentation is what decides it	On a single B2B account the outcome turns on paper more than on persistence. A signed SOW or MSA, itemized invoices, delivery or go-live evidence, and the email trail where they acknowledged the work — that package is the difference between a fast resolution and a stalemate. Send it at placement and we will tell you honestly what we think it is worth before we work it.
4. What happens if they simply refuse	Commercial skip tracing to locate the operating entity, its successors and its principals, then persistent multi-channel demand. If the account still will not engage and the documentation supports it, we review legal escalation with you before anything is filed — you decide, not us. A third-party demand on agency letterhead alone resolves a meaningful share of accounts that have gone quiet on the vendor.
5. Placement — and California	Placement is a single upload through the secure portal; no integration, no template to build. On geography: recovery reach is nationwide across all 50 states. SWRS does not do consumer collection in California, Oregon or Washington, but commercial B2B receivables are not consumer debt — your accounts, and your clients' accounts, are worked normally.

One account or one hundred — the same visibility

Every placement runs through our secure portal. For a single account that means you can see exactly what has been done, when, and by whom, without emailing anyone to ask.

UPLOAD AND GO

Place a single account or an AR export in one upload — we map your columns, no re-keying and nothing to configure.

LIVE ACCOUNT ACTIVITY

Every contact attempt, response and payment logged and visible in real time — not a monthly PDF.

SECURE DOCUMENT EXCHANGE

Send the SOW, MSA, invoices and the email trail safely inside the portal — on a B2B account this is what resolves it.

DIRECT-PAYMENT REPORTING

Log a payment made directly to Conveyance so the balance stays accurate and your client is never contacted about money already paid.

THE HONEST READ ON ONE ACCOUNT

What separates the wins from the write-offs

You should hear this from us rather than discover it later: on a single commercial account the outcome is close to binary — it resolves or it doesn't, and the average across a one-account placement is not a meaningful number. Two things move the odds, and neither is how hard anyone dials.

DOCUMENTATION

The accounts above that recovered in full were the ones that arrived with a signed agreement, clean invoices and proof the work was delivered. Thin paper is the single most common reason a good commercial balance stalls.

AGE AT PLACEMENT

Fresh commercial balances often resolve in 30–60 days. A balance that has sat a year or more has stale contacts, a debtor who has re-budgeted around it, and materially lower odds — regardless of who works it.

We will give you a straight, documentation-based read on your account before it is worked — including telling you if we think it is a poor candidate. On contingency, we have no reason to take a file we do not believe in.

Recovering the invoice after the project is already delivered

The hardest dollars a consulting firm collects are the ones owed after go-live, when the value is in the client's hands and the leverage is gone. That is the balance a third party is actually useful for.

Unpaid project & implementation fees

Consulting hours, ERP deployment and integration milestones, and post-go-live support invoices that aged past terms once the work was done.

Disputed scope & change orders

Documentation-driven validation against the SOW, change orders and delivery evidence — separating a genuine scope dispute from a stall.

Non-responsive commercial accounts

Commercial skip tracing on the operating entity, its successors and its principals when a distributor reorganizes, is acquired, or simply stops replying.

AR management & ongoing support

Beyond one-off recovery we can work aged commercial AR on a continuing basis — useful as Conveyance scales across the US, AU and NZ.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

Place the one account and judge us on it.

Send the balance with whatever documentation you have and we will give you an honest read before we work it. If the ~\$30K account lands in the next few weeks, we can look at both together and reprice accordingly.
