SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

DENTAL PATIENT RECEIVABLES · CAPABILITIES OVERVIEW

Debt Collection for Dental Practices

Recovering past-due patient balances — implants, cosmetic & treatment-plan receivables — on pure contingency

Prepared for **Accent Dental** · July 2026

01 — INTRODUCTION

A recovery partner for the balances patients leave behind

To the Accent Dental team — thank you for requesting a quote. With two Kansas locations and a practice built around implants, crowns, dentures and cosmetic care, the hardest dollars you'll collect are the large self-pay and after-insurance balances patients stop paying once the treatment is finished and the visit is behind them.

Past-due patient balances aren't a front-desk problem — they're a cash-flow problem. An implant, denture, veneer or crown-and-bridge case can leave a large patient responsibility that quietly ages into a write-off while your team is focused on the chair, not the phone.

Southwest Recovery Services works patient receivables on **pure contingency since 2004** — licensed and bonded where required, including Kansas, and HIPAA-aware in how we handle patient information. Recovery is **reputation-first**: firm, professional, and protective of the name and the reviews you've built across both offices. You place accounts through a secure portal that takes a patient-A/R aging export from your practice-management system. No recovery, no fee.

02 — AT A GLANCE

Two decades of receivables recovery — nationwide

A documented, compliant recovery process a busy multi-location practice can plug in without hiring a billing or collections person — and without putting your name at risk.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked

03 — YOUR QUESTIONS, ANSWERED

The questions a practice asks — answered directly

You asked for a quote; here is exactly how we work, in plain terms, before a single account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — $0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your patient A/R.
2. Will this hurt our reputation with patients?	This matters most for a community practice with the reviews you've earned, and it's how we're built. Recovery is empathy-first and fully compliant — no threats, no misrepresentation. We represent Accent Dental professionally, so a past-due patient today can still be a returning patient tomorrow.
3. Compliance & patient data	FDCPA, Reg F, and TCPA guardrails on every account, and HIPAA-aware handling of any patient information you place. Licensed and bonded where required, including Kansas. Every contact is documented and defensible.
4. What to place — and when	Self-pay balances, the patient-responsibility portion left after insurance, denied or maxed CareCredit applicants, and broken payment-plan balances. Place at roughly 90 days past due — the earlier a balance is placed, the more of it we recover.
5. Onboarding & placement	Low-lift. Export a patient-A/R aging report from your practice-management system (Dentrix, Eaglesoft, Open Dental, Curve, and others) or a simple spreadsheet, and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.

THE SWRS CLIENT PORTAL

PMS-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your patient-A/R export and give your front office live, self-service visibility throughout recovery.

PMS-READY PLACEMENT

Upload a patient-A/R aging export from Dentrix, Eaglesoft, Open Dental or your PMS — we map your columns, no re-keying.

SECURE, HIPAA-AWARE EXCHANGE

Send statements and account documentation safely inside the portal — the paper that resolves questions fast, handled with care.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's been recovered across both locations.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to the practice, so balances stay accurate and no one is over-contacted.

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE COST OF WAITING

Why patient balances recover best while they're fresh

A patient balance is most collectible while it's fresh — the visit is recent, contact details are current, and the treatment is top of mind. Every month it ages, people move, memories fade, and the balance competes with newer bills. The highest-leverage change a practice can make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates; balances left a year or more collect a fraction of that.

THE STANDING RULE

A simple "place at 90 days" policy recovers more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Real placed-versus-recovered results from SWRS's dental book, anonymized by sub-sector; individual client names withheld. Patient A/R behaves differently than commercial debt — balances are smaller and harder to locate, so placing early matters. Results vary by account age, balance size and documentation; we give an honest, age-based read on a representative sample first.

05 — BUILT FOR DENTAL & PATIENT A/R

We understand a dental ledger

A practice built on implants, crowns, dentures and cosmetic care creates a specific patient-A/R profile. Our playbook is built for exactly that.

Large treatment-plan balances

High-dollar self-pay balances from implants, crowns & bridges, dentures and veneers — pursued professionally after treatment is complete.

After-insurance patient responsibility

The portion insurance didn't cover is often where the real leakage is. We recover the patient balance without straining your front office.

Denied financing & broken plans

CareCredit denials and defaulted payment-plan balances become self-pay A/R — we work exactly those.

Reputation-first & HIPAA-aware

Empathetic, compliant contact that protects a community practice's name and the reviews you've earned across both offices.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
