SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

RESIDENTIAL & COMMERCIAL HVAC RECOVERY · CAPABILITIES OVERVIEW

Receivables Recovery for HVAC & Home Services Contractors

Recovering past-due residential and commercial trade invoices — on pure contingency

Prepared for **Air-Tech Mechanical** · September 2026

01 — INTRODUCTION

A recovery partner for the invoices that go unanswered

To the Air-Tech Mechanical team — a Florida HVAC book carries two very different past-due accounts at once: the homeowner who stops returning calls after a system replacement, and the builder or property manager who lets a trade invoice drift past terms. Both tie up cash you've already earned.

Past-due receivables aren't a support problem — they're a cash-flow problem. Every unpaid service call or system install ties up working capital and, left long enough, becomes a write-off.

Southwest Recovery Services works both residential and commercial receivables on **pure contingency since 2004** — $0 upfront, no retainer, no minimum. You place accounts through a secure portal; we work them, on your behalf and in your name where it protects the relationship.

02 — AT A GLANCE

Two decades of recovery — residential and commercial, side by side

A track record built on both consumer service-call balances and commercial trade accounts, with the compliance discipline a homeowner-facing brand needs and the persistence a builder account needs.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked
51% of matured client portfolios see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004

03 — YOUR QUESTIONS, ANSWERED

Your three questions — answered directly

Exactly what you asked, in order, plus how we handle a mixed residential/commercial HVAC book specifically.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure (B2B vs. B2C)	Pure contingency on both portfolios — $0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. Commercial trade and residential consumer accounts are priced on separate schedules that scale with balance age and size; we quote both once we've reviewed a representative sample of your $100–$10,000 aging.
2. $0 upfront, fee only on recovery	Confirmed. No cost to place accounts, no cost while we work them — you're billed only against what's actually collected. Nothing changes that on either the residential or commercial side.
3. Onboarding & first placement	Fast and low-lift. Export your aging from Housecall Pro (or QuickBooks) and upload it through our secure portal — we map the columns, so there's no re-keying and no separate process for homeowner vs. trade accounts. Outreach on your first batch begins within 24–48 hours of a documented placement.
How homeowners are treated	Every residential contact is FDCPA-compliant, professional, and non-confrontational — the goal is payment without damaging Air-Tech's name or a repeat-customer relationship. It's the same discretion we apply for every consumer-facing client, on every call.

THE SWRS CLIENT PORTAL

One portal for both portfolios — residential and commercial

Every placement runs through our secure portal — built to take an export straight from your field-service or accounting system and give you live visibility across both your homeowner and trade accounts.

FIELD-SERVICE-READY PLACEMENT

Upload an aging export from Housecall Pro, QuickBooks, or your billing system — we map your columns, no re-keying.

SECURE FILE EXCHANGE

Send work orders, signed estimates, invoices, and communication logs safely inside the portal — the documentation that resolves a disputed trade invoice fast.

REAL-TIME REPORTING

Run and export recovery reports on demand, split by residential vs. commercial or by location — Port St. Lucie, Palm Beach, Orlando.

DIRECT-PAYMENT REPORTING

Log a payment a customer makes directly to Air-Tech, so balances stay accurate and no one is over-contacted.

$2.4K recovered

of ~$11.2K placed

22% recovered

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE PLACEMENT-TIMING ADVANTAGE

Why a fresh service invoice recovers best

An HVAC balance is most collectible while the job is fresh in the customer's mind; every month it ages, contact information goes stale and leverage erodes. The highest-leverage change most contractors make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Accounts under ~90 days past due often resolve in 30–60 days; balances that sit a year collect a fraction of that — true on both the homeowner and the trade side.

THE STANDING RULE

A fixed "place at 90 days" policy recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing early.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR HVAC & HOME SERVICES RECOVERY

Cutting the days between the invoice and the deposit

Days Sales Outstanding measures how long a completed job sits as a receivable before it becomes cash. Every month a service-call or install invoice ages past terms erodes both recoverable value and the working capital you need for the next job.

Non-responsive homeowners

Persistent, professional multi-channel outreach for customers who stop answering after the job is done — without damaging Air-Tech's name.

Disputed trade invoices

Documentation-driven validation — signed estimates, work orders, change orders — that separates a genuine dispute from a stall tactic on a builder account.

Every balance type

Service calls, repairs, installs, and full system replacements from $100 to $10,000 — one partner, one portal, for both portfolios.

Florida-based reach

Recovery coverage across your Treasure Coast and South Florida service area — Port St. Lucie, Palm Beach, and Orlando.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
