SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

COMMERCIAL & INDUSTRIAL RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

Receivables Recovery for Plastics & Recycling

Recovering past-due trade invoices on scrap, resin and toll-processing accounts — on pure contingency

Prepared for **Alandro Plastic Resources** · September 2026

01 — INTRODUCTION

Two accounts, two questions — answered in order

Brenda — thank you for reaching out. You asked two things: what recovery costs, and what information we need in order to work your two outstanding balances of **$9,658.88** and **$19,894.10**. Both are answered plainly in the next two sections, with no obligation attached to either.

Trade receivables in recycling and compounding go quiet for predictable reasons. A buyer disputes a load on contamination or spec after it has already been consumed; a broker takes delivery and stops answering; a converter stretches net terms until the balance is a year old. None of those are billing problems — they are working-capital problems, and every month they sit, the material is gone and the leverage erodes.

Southwest Recovery Services is an outsourced receivables recovery partner working commercial, B2B balances on **pure contingency since 2004**, with recovery reach across all 50 states. You place accounts through a secure portal that takes your existing AR aging export — no re-keying, no software to buy. No recovery, no fee.

02 — AT A GLANCE

Two decades of commercial recovery — nationwide

A track record built on high-volume B2B trade receivables and a documented, defensible process — the kind of reach a two-person accounting office cannot build in-house and should not have to.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked
51% of matured client portfolios see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

03 — YOUR QUESTIONS, ANSWERED

Your two questions — answered directly

Cost first, then exactly what a placement file needs. Everything below applies to both of the balances you named.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. What it costs	Pure contingency — **$0 upfront, no retainer, no monthly minimum, no cost to place**. You pay a pre-agreed percentage only of what we actually recover; if we collect nothing, you owe nothing. The rate scales with the age, balance and volume of what you place, and we quote it once we have seen a representative sample of your aging — not before, because quoting blind serves neither of us.
2. What information we need	Less than most people expect. Per account: the debtor's legal business name and DBA, billing and physical address, a contact name with phone and email, the invoice number(s), invoice date, original balance, any payments applied, and the current balance. That is the minimum to begin work.
What makes it work faster	Supporting documents lift recovery materially on commercial accounts: the signed purchase order or contract, the itemized invoice, proof of delivery or bills of lading, weight or scale tickets, certificates of analysis or spec sheets, and the email trail showing the balance was acknowledged. On a disputed load, the scale ticket and the COA usually settle it.
3. Disputed loads	A dispute pauses recovery — it does not end it. We validate the account against the paper and speak with both sides. Contamination and off-spec claims on material that has already been processed are the most common commercial dispute we see, and documentation decides them. Investigation typically adds 30–60 days.
4. Debtors who stop answering	The core of what we do: persistent, compliant multi-channel outreach; commercial skip tracing to locate the operating entity, its successors and its principals when a business goes dark; and review of legal escalation for accounts that still will not engage. A third-party demand on agency letterhead alone resolves a meaningful share of silent accounts.
Placement and turnaround	Low-lift. Upload an AR aging export from your accounting system through the portal — we map your columns. Documented placements begin outreach within 24–48 hours. Two accounts can be placed one at a time; there is no volume minimum.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
Cross-border balances	Recovery reach is nationwide across all 50 U.S. states. Given Alandro's position on the Brownsville–Matamoros corridor, we scope U.S.-domiciled debtors first and handle Mexican and other international balances through our legal-forwarding network case by case — we will tell you honestly which of your two accounts falls where before anything is placed.

THE SWRS CLIENT PORTAL

Accounting-system-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take the AR export you already run and give your accounting office live, self-service access throughout recovery.

AGING-EXPORT PLACEMENT

Upload an AR aging export from QuickBooks, Sage, NetSuite or your ERP — we map your columns, so there is no re-keying.

SECURE DOCUMENT EXCHANGE

Send POs, invoices, BOLs, scale tickets and COAs safely inside the portal — the documentation that resolves contamination and spec disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of your file, not a monthly PDF.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to Alandro, so balances stay accurate and no one is over-contacted.

04 — CASE STUDIES

SWRS Commercial Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's industrial and materials book, anonymized by sector and shown at the scale a file like yours actually places. The spread is real — some books recover most of what is placed, some do not, and the difference is almost always age and documentation.

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

THE AGE CURVE

Why a fresh trade invoice recovers best

A commercial balance is most collectible while it is fresh. Every month it ages, the buyer's contact data goes stale, the people who took delivery move on, and the leverage the paperwork gave you erodes. The highest-value change most accounting offices make is not chasing harder — it is placing sooner.

FRESH VERSUS AGED

Accounts under roughly 90 days past due often resolve in 30–60 days; balances that have sat a year recover a fraction of that.

A STANDING RULE BEATS A JUDGMENT CALL

A fixed "place at 90 days" policy recovers materially more than letting balances drift toward write-off — and on contingency there is no cost to placing.

Recovery varies by portfolio. SWRS gives an honest, age-based read on a representative sample before any accounts are worked — including telling you when a balance is not worth placing.

05 — BUILT FOR INDUSTRIAL & TRADE AR

Cutting the days between shipped and banked

Days Sales Outstanding measures one thing: how long material you have already shipped sits as a receivable before it becomes cash. Median DSO runs about 43.5 days and the strongest quartile collects in roughly 25 — every month past that erodes both recoverable value and the working capital that funds your next buy.

Buyers who have gone silent

Commercial skip tracing on the business and its principals, plus persistent multi-channel demand for accounts that stopped answering after delivery.

Disputed and off-spec claims

Documentation-driven validation — POs, BOLs, scale tickets, COAs — that separates a genuine quality dispute from a stall tactic.

Every commercial balance type

Scrap purchases, resin and compound sales, toll-processing fees, freight and demurrage — one partner, one portal.

Nationwide reach

Recovery across all 50 states from 12 offices in 7 states — built for a customer base that does not stop at the Texas line.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
