

Providing Creative Solutions to Common Problems

RESIDENTIAL CONTRACTOR & HOME-SERVICES RECOVERY · CAPABILITIES OVERVIEW

Receivables Recovery for Residential Contractors

Recovering completed-work balances from homeowners — on pure contingency, with your approval on every decision

Prepared for **Zetas Contracting LLC dba Rocky Ridge Handyman** · August 2026

The work is finished. The invoice isn't.

Francisco — thank you for reaching out. A residential contractor carries a risk almost no other trade does: the labor and the material are already spent, the homeowner already has the finished work, and the only leverage left is the paper you kept. This overview covers how Southwest Recovery works that book, and what results look like across our residential trades clients.

Yes — we accept individual residential contractor accounts involving homeowner consumer balances, including in Colorado. Southwest Recovery Services has been a licensed, bonded outsourced receivables recovery partner since 2004, working consumer and commercial balances from 12 offices across 7 states, including Colorado. Home-services and residential trade contractors — plumbing, HVAC, roofing, flooring, remodeling, doors and windows — are one of our established books.

You place accounts through a secure portal, you keep control of settlement and legal decisions, and you owe nothing unless money is actually recovered. **No placement fee, no setup fee, no monthly minimum, no retainer, no upfront legal expense.**

Two decades of receivables recovery — Colorado and nationwide

A licensed, accredited recovery partner with a real track record in the residential trades — and the compliance discipline that protects a contractor's name in the neighborhoods it works in.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked
52% of placed accounts see a recovery	50 states — nationwide recovery reach	4.9★ Google client rating	\$0 upfront — no recovery, no fee

Commercial & B2B collections since 2004

Nationwide — all 50 states

12 offices across 7 states

Skip tracing on businesses & principals

Contingency — no recovery, no fee

How Southwest Recovery works a residential contractor book

The five questions every contractor asks before placing a first account.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. What you can place	Homeowner balances on completed construction, remodeling, repair and installation work, including balances carrying approved change orders. Consumer accounts are worked under FDCPA, Regulation F, TCPA and the Colorado Fair Debt Collection Practices Act. Colorado is an operating state for us. We do not take consumer placements in California, Oregon or Washington; Minnesota is restricted.
2. Disputed invoices & post-completion complaints	A homeowner raising a concern after the work is done is not automatically a dispute — and a genuine dispute pauses recovery rather than ending it. We validate against your paper: signed agreement, approved change orders, completion photographs, the message trail. Most post-completion objections resolve on documentation alone. Where a dispute is real we say so honestly and return the account, rather than manufacture pressure that would expose you.
3. Homeowners who have gone silent	Consumer skip tracing through Experian data locates a current address, phone and employment when a customer stops answering. From there, coordinated letter, phone, email and SMS contact — plus, where you authorize it, optional balance reporting to Equifax and Experian, frequently the strongest motivator on a consumer balance.
4. Fee structure	Pure contingency since 2004. No placement fee, setup fee, minimum, monthly fee, retainer or upfront legal expense — and if nothing is recovered, nothing is invoiced. Your rate is stated on the agreement before you place a single account. Settlements require your authorization, legal escalation is optional and written-authorization only, and any account can be recalled without penalty.
5. Placing the first account	One account is placed the same way as a hundred, with no volume commitment. Send the signed agreement, estimate, approved change orders, final invoice, payment ledger, completion photographs, communication trail and the homeowner's identifiers. Compliant outreach typically begins within 24 to 48 hours.

**THE SWRS CLIENT
PORTAL**

Place one account or a hundred — and see everything, any time

Every placement runs through our secure portal. There is nothing to install and no volume commitment — a single \$5,000 account is placed the same way as a batch.

SINGLE-ACCOUNT OR BULK PLACEMENT

Enter one homeowner account by hand or upload an export from QuickBooks, Jobber, Housecall Pro or a spreadsheet — we map your columns.

SECURE DOCUMENT EXCHANGE

Upload the signed agreement, change orders, invoices, completion photos and receipts directly — the documentation that ends a disputed invoice fast.

REAL-TIME STATUS AND REPORTING

See exactly what has happened on your account, when, and what is next — on demand, not in a monthly PDF.

DIRECT-PAYMENT REPORTING

Log a payment a homeowner makes straight to you, so the balance stays accurate and nobody is contacted for money already paid.

ROOFING & CONSTRUCTION

Residential exterior

\$34.6K recovered

of ~\$337K placed

10% recovered

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

**WHAT ACTUALLY MOVES
THE NUMBER**

Why the contractor file recovers better than almost any consumer balance

The difference between a 49% book and a 10% book above is rarely how hard the accounts were worked. It is two things, and you already control both.

DOCUMENTATION

A signed agreement, approved change orders, completion photographs and a clean message trail turn “I’m not happy with the work” into a resolvable conversation. Contractors who keep what you keep sit at the top of that range.

AGE AT PLACEMENT

A balance placed inside 90 days of the last payment recovers a multiple of one placed at a year. A standing rule — place at 90 days — out-recovers chasing for a year first, and on contingency there is no cost to placing sooner.

Recovery figures vary by account age, balance, documentation quality and industry. Southwest Recovery gives an honest read on a file before it is worked, and says so when an account is unlikely to recover.

Firm recovery that does not cost you the neighborhood

A handyman and remodeling business in Denver metro lives on referrals and reviews. The way a past-due homeowner is treated is not a side concern — it is the whole risk. Every account is worked under FDCPA, Regulation F and Colorado law, documented end to end, and audited for compliance.

Disputed & contested invoices

Documentation-driven validation using your contract, change orders and completion photos — separating a real concern from a stall.

Homeowners who have gone silent

Consumer skip tracing through Experian data to locate a current address, phone and employment when a customer stops answering.

Optional credit bureau reporting

Where you authorize it and the account qualifies, balances can be reported to Equifax and Experian — often the single strongest motivator on a consumer balance.

Your name, protected

Compliant outreach only. No threats, no misrepresentation, no pressure tactics — because the homeowner still lives three doors down from your next job.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier, better-targeted contact that resolves accounts faster and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
