

Providing Creative Solutions to Common Problems

COMMERCIAL & CONSUMER RECEIVABLES RECOVERY · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

A pure-contingency escalation layer for the receivables Orkin's in-house team and RAC can't economically finish — additive, not a replacement

Prepared for **Orkin** · July 2026

Recovery on the tail your team already works — at zero cost to test

Prepared for Orkin — a 125-year, ~400-branch leader inside Rollins, Inc. (NYSE: ROL). Your consolidated billing team and Rollins Acceptance Company already work the front of the book. This is about the tail behind them: the commercial balances that slow-pay past the point it's worth chasing, and the consumer financed balances that default and age toward write-off.

We complement your in-house function — we don't replace it. Rollins' own reporting names accounts-receivable and financed-receivable credit losses as a risk: roughly **\$202M in net trade receivables** and **~\$155M in financed receivables** on the books, against a **\$1.24B commercial** service line. On a book that size, the last few points of recovery are pure margin — and they're exactly what an internal team, sized for current AR, has to let go.

Southwest Recovery Services is a commercial and consumer collection agency working receivables on **pure contingency since 2004**, nationwide across all 50 states. Place a batch of your late-stage or already-written-off accounts through a secure portal; we work them; you pay a percentage only of what we actually recover. No retainer, no setup fee. No recovery, no fee.

Two decades of receivables recovery — nationwide

The recovery capacity an enterprise shared-services team can plug in without adding headcount — documented, compliance-first, and paid only on results.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

What an enterprise finance team asks us

The questions that matter when you already have an in-house team and RAC, and you're deciding what to place.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
How we fit with RAC & your in-house team	We're the escalation layer behind them, not a replacement. You keep originating, billing and financing in-house; we take the delinquent and charged-off tail your team has stopped chasing — so their capacity stays on current, collectible AR.
Fee structure	Pure contingency — \$0 upfront, no retainer, no minimum. You pay a pre-agreed percentage only of what we actually recover; the rate scales with the age, balance and volume of the placement. Zero cost to test.
What we recover	Slow-pay and disputed commercial B2B balances (national and multi-location accounts), aged consumer financed / installment balances that defaulted, final balances on terminated service contracts, and charged-off accounts already written down.
A no-risk pilot	Place one batch of already-written-off or late-stage accounts. We work them on contingency and you measure the recovered dollars against your internal run-rate — a clean, low-lift test before any broader rollout.
Compliance	FDCPA / Reg F on every consumer account; documented, auditable process; current on state licensing and medical/consumer credit-reporting rules. We geo-screen placements up front — SWRS is not licensed in every state, so out-of-footprint consumer accounts are excluded before work begins.
Scale across Rollins	Start with Orkin; the same contingency model and single portal extend across Rollins' brands under one master agreement, with consolidated reporting for shared services.

Low-lift intake and full visibility, on demand

Every placement runs through our secure portal — built to take an AR / aging or write-off export from your billing system and give your team live, self-service access throughout recovery, backed by a dedicated account manager.

SYSTEM-READY PLACEMENT

Bulk-upload an AR / aging or charged-off export (CSV/Excel) from your billing platform — we map your columns, no re-keying.

SECURE FILE EXCHANGE

Send contracts, service agreements, invoices and statements safely inside the portal, not over email.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live dashboard your shared-services team can audit, not a monthly summary.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to you or to RAC, so balances stay accurate and no one is over-contacted.

THE ESCALATION ADVANTAGE**Why the written-off tail is worth placing**

Accounts an internal team stops chasing aren't worthless — they're uneconomical to chase in-house. On contingency, someone else's recovery on that tail is pure margin to you.

THE AGE CURVE

Recovery falls sharply with age — roughly 85–90% at 30 days to ~23% at a year. The tail recovers lower, but at zero cost to place and only paid on results, every recovered dollar is upside.

CAPACITY, NOT REPLACEMENT

Placing the tail frees your consolidated team and RAC to stay on fresh, high-yield AR — the escalation layer does the low-ROI chasing they can't justify internally.

We speak shared services

A national, multi-brand receivables book has a specific recovery profile — commercial, consumer-financed, and multi-location. Our playbook and portal are built for it.

Escalation / overflow layer

We take the delinquent and charged-off tail behind your in-house team and RAC — additive recovery, no replacement, no headcount.

Commercial & consumer

Recovery across slow-pay B2B accounts and defaulted consumer financed balances alike — one partner for both sides of the book.

National, multi-location reach

Recovery across all 50 states from 12 offices in 7 states — matched to a 400-branch, national-accounts footprint.

Compliance-first

FDCPA / Reg F on every consumer account, documented and auditable, with up-front geo-screening — built for an enterprise's risk bar.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services

Let's put a no-risk pilot against your written-off accounts.

A short call to scope one batch of late-stage or charged-off accounts — commercial or consumer — and put a contingency rate against it. You measure the recovered dollars against your internal run-rate; nothing is owed unless we collect.
