

Providing Creative Solutions to Common Problems

DENTAL & IMPLANT RECEIVABLES · CAPABILITIES OVERVIEW

Debt Collection for Dental Practices

Recovering after-insurance patient balances, self-pay implant & cosmetic receivables — on pure contingency

Prepared for **Main Street Dental** · July 2026

A recovery partner for the balances patients leave behind

To Casandra and the Main Street Dental team — thank you for requesting a quote. A locally owned, full-service practice doing implants, cosmetic and same-day lab work carries a specific kind of receivable: the patient-responsibility portion left after out-of-network claims, and the large self-pay balances from implant, cosmetic and ortho cases that fall to the patient once treatment is complete.

Past-due patient balances aren't a front-desk problem — they're a cash-flow problem. An implant case, a cosmetic or same-day-lab restoration, or an ortho plan can leave a sizable balance that quietly ages into a write-off while your team is focused on care, not chasing statements.

Southwest Recovery Services works patient receivables on **pure contingency since 2004** — licensed and bonded where required, including Arizona, and HIPAA-aware in how we handle patient information. Recovery is **reputation-first**: firm, professional, and protective of the name and reviews you've built in Verrado. You place accounts through a secure portal that takes a patient-A/R aging export from your practice-management system. No recovery, no fee.

Two decades of receivables recovery — nationwide

A documented, compliant recovery process a busy single-location practice can plug in alongside its front office — without adding collections staff or putting patient goodwill at risk.

2004 Recovering commercial receivables since	\$975M+ Receivables placed (all industries)	\$76M+ Recovered for clients	800K+ Accounts worked

The questions a practice asks — answered directly

You asked for a quote; here is exactly how we work, in plain terms, before a single account is placed.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — \$0 upfront, no retainer, no monthly minimum. You pay a pre-agreed percentage only of what we actually recover. The rate scales with the age and size of the balances; we quote your rate once we see a representative sample of your patient A/R.
2. Will this hurt our reputation with patients?	This matters most for a locally owned practice built on reviews and referrals, and it's how we're built. Recovery is empathy-first and fully compliant — no threats, no misrepresentation. We represent Main Street Dental professionally, so a past-due patient today can still be a returning patient tomorrow.
3. Compliance & patient data	FDCPA, Reg F, and TCPA guardrails on every account, and HIPAA-aware handling of any patient information you place. Licensed and bonded where required, including Arizona. Every contact is documented and defensible.
4. What to place — and when	The patient-responsibility portion left after insurance (especially out-of-network claims), self-pay implant / cosmetic / ortho balances, and denied, declined or defaulted CareCredit and Cherry financing. Place at roughly 90 days past due — the earlier a balance is placed, the more of it we recover.
5. Onboarding & placement	Low-lift. Export a patient-A/R aging report from your practice-management system (Dentrix, Eaglesoft, Open Dental, Curve, and others) or a simple spreadsheet, and upload it through our secure portal — we map your columns, no re-keying. Outreach begins within 24–48 hours of a documented placement.

PMS-ready intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your patient-A/R export and give your front office live, self-service visibility throughout recovery.

PMS-READY PLACEMENT

Upload a patient-A/R aging export from Dentrix, Eaglesoft, Open Dental or your PMS — we map your columns, no re-keying.

SECURE, HIPAA-AWARE EXCHANGE

Send statements, treatment plans and account documentation safely inside the portal — the paper that resolves questions fast, handled with care.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live view of what's been recovered, alongside your in-house billing.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to the practice, so balances stay accurate and no one is over-contacted.

THE COST OF WAITING

Why patient balances recover best while they're fresh

A patient balance is most collectible while it's fresh — the treatment is recent, contact details are current, and the case is top of mind. Every month it ages, patients move, memories fade, and the balance competes with newer bills. The highest-leverage change a practice can make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh balances (under ~90–120 days past due) resolve at materially higher rates; balances left a year or more collect a fraction of that.

THE STANDING RULE

A simple “place at 90 days” policy recovers more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Real placed-versus-recovered results from SWRS's dental book, anonymized by sub-sector; individual client names withheld. Large implant and cosmetic balances behave differently than small copays — documentation and account age drive recovery, so placing early matters. Results vary by account age, balance size and documentation; we give an honest, age-based read on a representative sample first.

We understand a dental ledger

A full-service practice combining family dentistry with implants, cosmetic, ortho and same-day lab work creates a specific patient-A/R profile. Our playbook is built for exactly that.

Large implant & cosmetic balances

High-dollar self-pay balances from implants, veneers, same-day-lab restorations and ortho — pursued professionally after treatment is complete.

After-insurance & out-of-network balances

The patient-responsibility portion left after out-of-network claims is often where the real leakage is. We recover it without straining your front office.

Declined financing & self-pay

CareCredit and Cherry denials, declines and defaults become self-pay A/R — we work exactly those.

Reputation-first & HIPAA-aware

Empathetic, compliant contact that protects a locally owned practice's name and the reviews you've earned in the community.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

“Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.”

— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services
