SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

MEDICAL PRACTICES RECOVERY · CAPABILITIES OVERVIEW

Receivables Recovery for Medical Practices

Recovering patient balances one to three years old — on pure contingency

Prepared for **Ohio Women's Health & Wellness** · October 2026

01 — INTRODUCTION

A recovery partner for the balances that go quiet after care

To Dr. Orafu and the team at Ohio Women's Health & Wellness — balances that are one to three years old are the hardest dollars a practice recovers. Your in-house team is busy keeping current billing moving; these older accounts need a dedicated partner and a patient-first approach.

Patient balances are a recovery problem, not a billing problem. Every balance that sits after the visit erodes toward write-off while your front desk carries the follow-up.

Southwest Recovery Services recovers patient and payer balances on **pure contingency since 2004**, under a Business Associate Agreement, nationwide. Place accounts through a secure portal that takes your practice-management export, and we work them with dignity and discretion. No recovery, no fee.

02 — AT A GLANCE

Two decades of recovery — nationwide

A track record built on high-volume receivables, including medical and women's health practices, and a documented, professional process.

2004 Recovering commercial receivables since	**$1.0B+** Receivables placed (all industries)	**$79M+** Recovered for clients	**880K+** Accounts worked

03 — YOUR QUESTIONS, ANSWERED

Your six questions — answered directly

Exactly what you asked, in order.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. OB/GYN & Ohio experience	Healthcare practices are a core part of our book, including OB/GYN and women's health practices, and we have an office in Ohio. Insurance denial and underpayment follow-up is available as an additional service, scoped once we have seen your accounts.
2. Approach to 1–3 year old balances	We start with a representative sample of your aging, score every account so effort goes where recovery is most likely, then run compliant outreach by text, email, live and AI-assisted calls and mailed notices. Older balances recover at a lower rate than fresh ones, and we will tell you plainly where your book sits.
3. Working with Greenway Centricity	You export a patient-balance report from Centricity (CSV or Excel) and upload it through our secure portal; we map your columns, so there is no re-keying. Your team keeps managing current billing and logs any direct patient payments in the portal so balances stay accurate.
4. Fee structure	Pure contingency — $0 upfront, no retainer, no minimum. You pay a pre-agreed percentage only of what we actually recover. We quote your rate once we have seen a representative sample of your aging.
5. Timeline & reporting	Outreach begins within 24–48 hours of placement. Account activity and recovery reports are live in the portal on demand, and collected funds are remitted every 30 days.
6. References & initial evaluation	Send a patient-balance aging summary (no patient identifiers needed) and we will give you an honest, age-based read before any account is worked. We can talk through comparable-practice results and references on a call.

THE SWRS CLIENT PORTAL

Low-lift intake and full visibility, on demand

Every placement is managed through our secure portal — built to take your exports and give your team live, self-service access throughout recovery, backed by a dedicated account manager.

PM-SYSTEM-READY PLACEMENT

Bulk-upload a patient-balance export from your practice-management or billing system — we map your columns, no re-keying.

SECURE, HIPAA-AWARE FILE EXCHANGE

Send statements, itemized bills and supporting records inside the portal under our Business Associate Agreement.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live dashboard, not a monthly summary.

DIRECT-PAYMENT REPORTING

Log payments a patient makes directly to the practice, so balances stay accurate and no one is over-contacted.

04 — CASE STUDIES

SWRS Healthcare Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's healthcare book, anonymized by sector. Across physician-practice placements at least a year old, the median client recovered about 7% and roughly three in ten recovered nothing; a one-to-three-year-old book sits toward the lower end of the range shown.

Anonymized by sector from Southwest Recovery's book; individual client names withheld. Results vary by account age, balance, documentation quality and industry. We do not publish blended portfolio averages.

WHY TIMING MATTERS

Why fresh balances recover best

A patient balance is most recoverable while the visit is recent; every month it ages, contact data goes stale and the relationship cools.

THE AGE CURVE

Fresh balances (under ~90 days) often resolve in 30–60 days; balances that sit a year collect a fraction of that.

THE STANDING RULE

A fixed “place at 90 days” policy recovers materially more than letting balances drift — and on contingency there’s no cost to placing.

Recovery figures vary by portfolio; SWRS gives an honest, age-based read on a representative sample before any accounts are worked.

05 — BUILT FOR MEDICAL PRACTICES

Recovery that protects the patient relationship

Patient balances behave differently from trade invoices: the person on the other end is someone you may treat again. Recovery has to be effective and respectful at the same time.

Self-pay & residual balances

Deductibles, co-insurance and balances after insurance, worked with payment plans and clear options.

Disputed & insurance-tangled accounts

Validation against the itemized statement and EOB, with insurance follow-up available as an additional service.

Every balance type

Self-pay, no-show and cancellation fees, plan balances and aged write-offs — one partner, one portal.

Nationwide, HIPAA-aware

Recovery across all 50 states from 12 offices in 7 states, under a Business Associate Agreement.

06 — AI-POWERED COLLECTIONS

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier, more respectful contact and fewer disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

07 — MEET THE FOUNDER

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**
